FEATURE OVERVIEW · NOVEMBER 2026

# ERFWeb

APPROVED
ERF-2026-000142

The Expense Report System: from the first receipt to cleared for payment.

| | |
|---|---|
| Filed by the employee | 01 |
| Approved at two levels | 02 |
| **Cleared by Finance** | **03** |

Developed by **Jay Bryan C. Abaoag**

Quality assurance **Carl**

THE SHORT VERSION

# One system for every expense report, from filing to payment.

| | |
|---|---|
| The R47 is generated from the report, never typed by hand | R47 |
| Every approver is found automatically and told by SMS and email | SMS · EMAIL |
| Late approvals are chased with daily reminders | 3 DAYS |
| Finance tracks receipts in one queue, with a status for every report | QUEUE |
| **Every step is recorded in an audit trail nobody can edit** | **AUDIT** |

WHO USES IT

# Six roles share one workflow.

ROLE 01

### Employee

Files reports, attaches receipts, re-files when returned.

ROLE 02

### Signatory Level 1

Endorses the reports of the people they cover.

ROLE 03

### Signatory Level 2

Gives final approval and decides Finance queries.

ROLE 04

### Finance

Checks receipts, clears for payment, approves signatures.

ROLE 05

### Expense Verifier

Checks one line that Finance has questioned.

ROLE 06

### Administrator

Sets up accounts, rates and rules; never sees reports.

THE JOURNEY

# A report collects five stamps on its way to payment.

**Returned**
Back to the employee with a reason. Approval starts again when re-filed.

**Rejected**
Final, with a reason. The report can never be filed again.

**Questioned**
After approval, Finance can send a single line for checking.

# 01

# Filing

What the employee does, and what ERFWeb does for them.

FILING · REPORT TYPES

# Three report types, each with its own money block.

| REPORT TYPE | WHAT IT CARRIES | WHAT THE R47 SHOWS |
|---|---|---|
| **Reimbursement** | Expense lines only | Total due to the employee |
| **Liquidation of Cash Advance** | Cash advance received rows | Advance less expenses: balance due, page by page |
| **Replenishment of Revolving Fund** | The revolving fund amount | Fund amount and the expenses drawn on it |

> The form adjusts to the type the employee picks, so nobody fills in a block that does not apply.

# Lines fill themselves where they can.

01 **Meals by tap.** Breakfast, lunch, dinner; the rate for the date applies itself.

02 **Fares leg by leg.** Taxi, Grab, jeepney and more, added up per trip.

03 **Receipts attached.** Photo or PDF; phone photos shrink before upload.

04 **Sorted for the R47.** Lines go in the order the form prints them.

BEFORE YOU FILE

| | |
|---|---|
| Purpose filled in | ✓ |
| At least one line | ✓ |
| Approver found | ✓ |
| Amounts add up | ✓ |
| Signature uploaded | optional |

The ERF number is issued the moment the report is filed.

# Tick a CRM visit and the line is written for you.

01 **Details filled.** Date, customer, work-with, service details and fare route.

02 **Several visits, one line.** Service numbers joined with " / ".

03 **No double claims.** One CRM activity belongs to one report only.

04 **Employee stays in charge.** They still enter the amount, OR number and receipts.

EXPENSE LINE · FROM CRM

**SR-FLD26286018 / SR-FLD26286048**

Customer site visit · two instruments serviced on one trip

| | |
|---|---|
| Date, customer, route | filled |
| Amount, OR number | by employee |

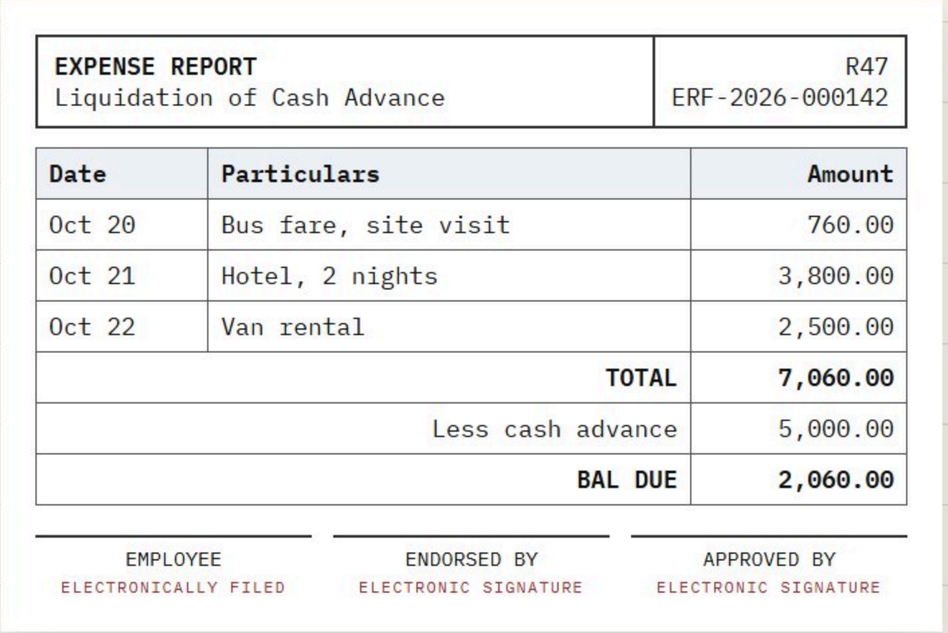

# The R47 is generated, never retyped.

01 **Same form as today.** Columns, page breaks and header details.

02 **Signed as it moves.** Approved signatures print with a watermark.

03 **Always current.** Built from the report every time it is opened.

04 **Share or act.** View, print, download, email, or approve from it.

**EXPENSE REPORT**
Liquidation of Cash Advance

R47
ERF-2026-000142

| Date | Particulars | Amount |
|---|---|---|
| Oct 20 | Bus fare, site visit | 760.00 |
| Oct 21 | Hotel, 2 nights | 3,800.00 |
| Oct 22 | Van rental | 2,500.00 |
| | **TOTAL** | **7,060.00** |
| | Less cash advance | 5,000.00 |
| | **BAL DUE** | **2,060.00** |

SAMPLE FIGURES

# 02

# Approval

How the right people see the report, decide, and get reminded.

# Approvers decide from one inbox.

| ACTION | WHO | WHAT HAPPENS |
|---|---|---|
| **Approve** | Level 1, Level 2 | Moves to the next step; the last approval sends it to Finance |
| **Return** | Level 1, Level 2 | Back to the employee with a reason; approval restarts on re-filing |
| **Reject** | Level 1, Level 2 | Final, with a reason |
| **Override** | Level 2 | Approves past a Level 1 who has not acted, with a reason |
| **Lower a line** | Level 1 | Reduces an amount before approving; the filed amount stays visible |

> The inbox shows **my turn**, **waiting for an earlier step** and **done**. Nobody approves their own report.

APPROVAL · ROUTING

# Nobody picks an approver by hand.

SCOPE

### Coverage decides

Each signatory covers a department or named people. ERFWeb finds every employee's Level 1 and Level 2.

FILING

### Fixed when filed

The route is saved at filing, so later scope changes never re-route a report in progress.

DELEGATION

### Stand-in, up to 90 days

An absent signatory names a stand-in. The R47 shows "on behalf of".

# Everyone hears at every step, and late approvals are chased.

SMS **Text messages** on filing, each approval and a return, to the employee and both approvers.

MAIL **Email with the R47 attached** for the same events, plus a rejection.

L2 **Escalation.** A late Level 1 is reported to the Level 2.

3

WORKING DAYS BEFORE THE FIRST REMINDER

Then every 2 working days.

# 03

# Finance

From approved report to cleared for payment, with an independent check when needed.

# Every approved report waits in one queue.

PENDING

RECEIPTS INCOMPLETE

RECEIPTS RECEIVED

CLEARED

### Record receipts

Mark incomplete with a remark on what is missing, or received. Received is never undone.

### Follow up

One click texts the employee and approvers. Follow-ups are counted.

### Clear

Clearing for payment is final. The queue exports to CSV.

FINANCE · VERIFICATION

# A doubtful line gets an independent check.

01 **Finance flags** one line on an approved report and gives the reason.

02 **An Expense Verifier** not involved in that report picks it up.

03 **The finding:** Verified, Verified with a note, or Not verified.

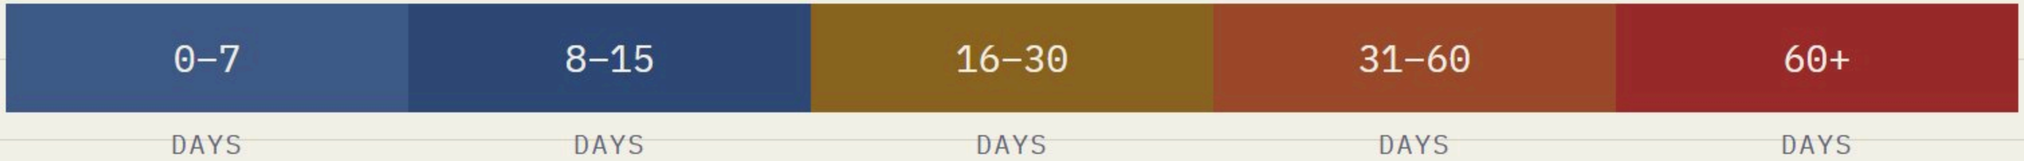

04 **If not verified,** Finance refers it to the Level 2 approver.

05 **Level 2 decides:** let it through, return the report, or reject it.

> Clearing waits until every open check is closed. Receipts can still be recorded meanwhile.

FINANCE · MONITORING

# See what is waiting, and what was spent.

Aging: open reports by days since final approval.

### Expense summary

Any date range, by employee and category. Finance sees everyone.

### Cost center budgets

Each department’s yearly budget: used, remaining, % used. Monitoring only.

### Exports

CSV, and PDF for aging and the summary. Every export is recorded.

# 04

# Control

How the company is set up, and the rules the server will not bend.

CONTROL · ADMINISTRATION

# Administrators shape the rules, never the reports.

ACCOUNTS

### Accounts and roles

Create accounts, grant roles, link CRM IDs.

RATES

### Dated rates

Meal and travel rates per person, grade, department or company.

MASTER DATA

### Departments and sites

Cost centers, currencies, fare modes. Retired, never deleted.

RULES

### Workflow rules

Level 2 threshold, SLA days, filing cut-off, receipt threshold.

R47

### R47 designer

Layout, header and texts, previewed on a real report before saving.

SIGNATURES

### Signature rule

E-signature with watermark, or status text only.

# The server enforces every control.

| CONTROL | WHAT IT STOPS |
| --- | --- |
| **No self-approval** | Approving, verifying or clearing your own report |
| **Separated roles** | Finance signing reports; the administrator reading them |
| **Append-only audit trail** | Edited or deleted history; the database refuses changes |
| **Sign-in lockout** | Password guessing: locked after 5 failed tries |
| **Nightly backup** | Data loss: kept for 14 days |
| **Health check** | Silent outages: checked every 5 minutes, with an email alert |

WHERE WE ARE

# Built and tested. Go-live is planned for mid-December.
