ERFWeb Employee Filing Guide

Nov 5, 2026 · @Jay Bryan

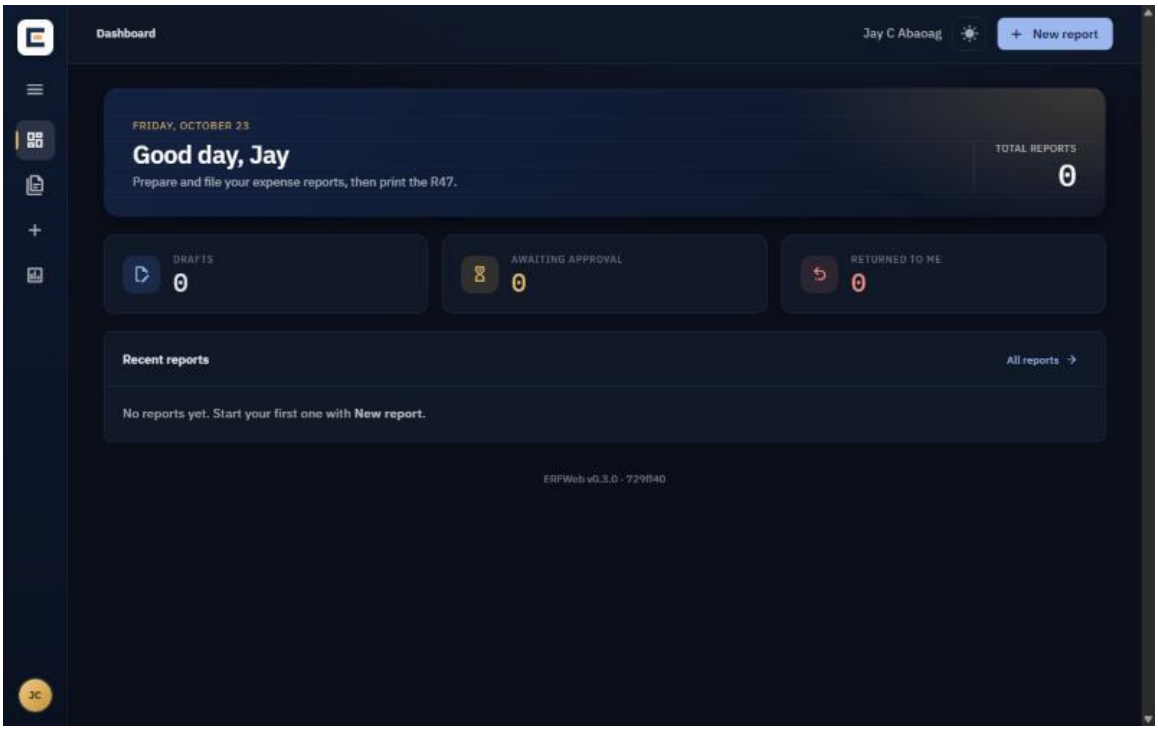

Before you start

You need an ERFWeb account and Chrome or Edge; your administrator sets up everything else once.

1. Open ERFWeb and sign in with the username and temporary password you were given. The sign-in page reads **ERS**, Expense Report System.
2. On your first sign-in ERFWeb opens **Change password**. Choose your own: at least 8 characters, different from your username and from the temporary one.
3. Ask your administrator to confirm these are set for you, or filing will be blocked:
    - your **approvers** (Level 1, and Level 2 if required),
    - your **meal and allowance rates**,
    - your **mobile number and email**, for notifications.
4. Your **signature** is optional. Without one you can still file; sign the printed R47 you hand to Finance. An uploaded signature prints on the R47 only after Finance approves it.
5. New accounts can file only after a **3-day waiting period** from registration. You can prepare drafts in the meantime.

6. Once a day, the first page you open shows **Quote of the day**. Click **Thanks** to close it, or **Healthy tips** for the Healthy living page.

Safari on iPhone, iPad and Mac cannot sign in yet.

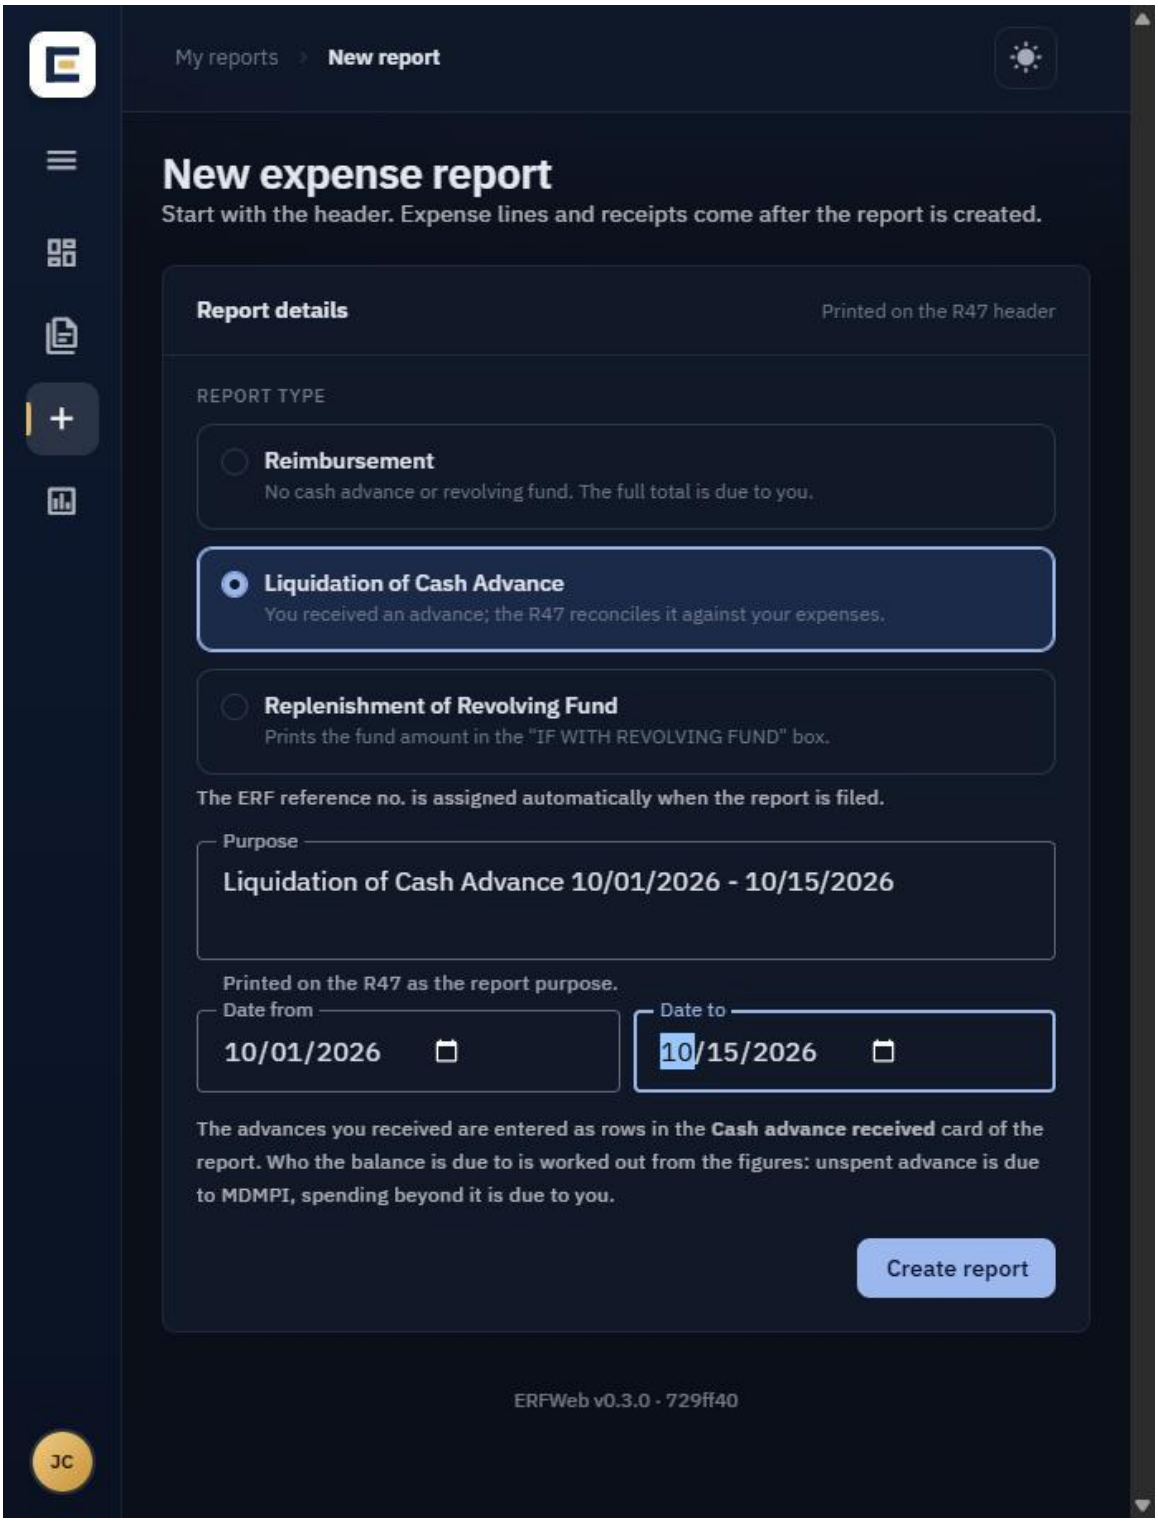

Step 1: Create the report

Start with the header; expense lines and receipts come after the report is created.

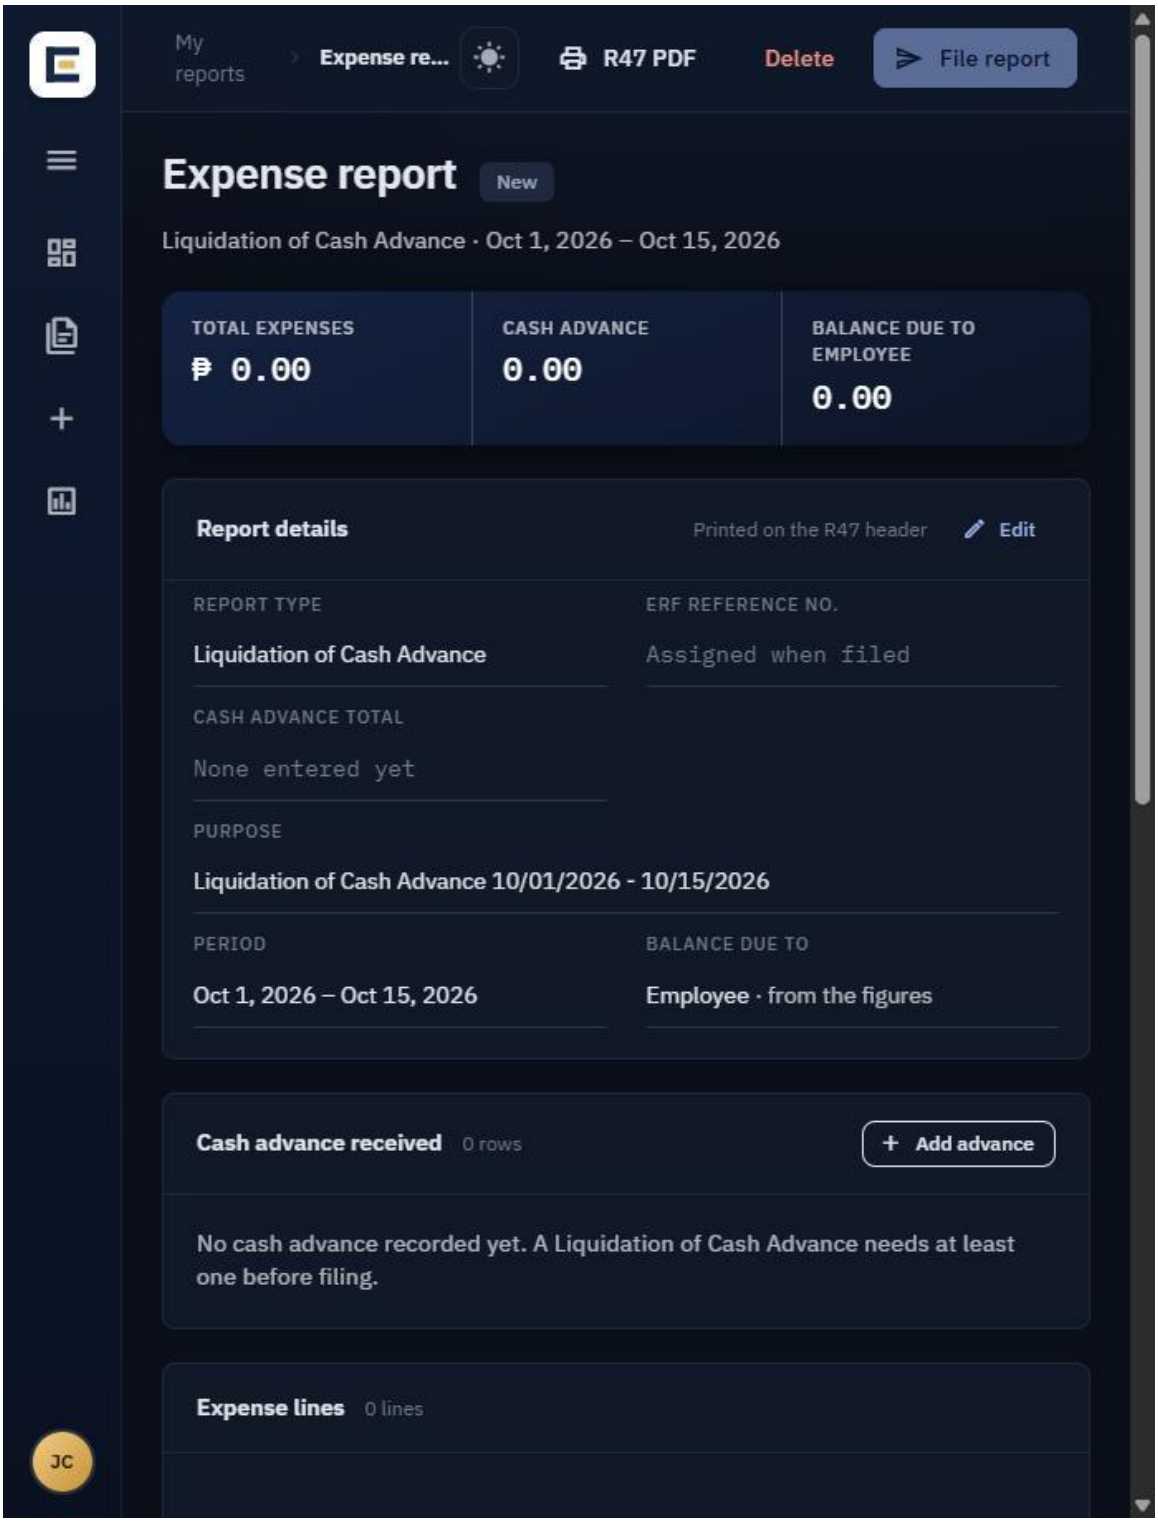

1. In the left menu, click **New report**.
2. Under **Report type**, pick one:

Report type	Use it when
Reimbursement	You paid out of pocket, with no cash advance; the full total is due to you
Liquidation of Cash Advance	You received a cash advance and are accounting for it
Replenishment of Revolving Fund	You hold a revolving fund and are topping it up

3. Enter **Date from** and **Date to**, the period your expenses cover.
4. Check the **Purpose**. ERFWeb fills it in for you (for example *Reimbursement 10/01/2026 - 10/15/2026*); type over it if you want different wording. It prints on the R47.
5. For a Replenishment, enter the **Revolving fund amount**.
6. Click **Create report**. The report opens in the editor as a draft (status **New**).

The ERF reference number (e.g. ERF-2026-000142) is assigned only when you file; drafts show "Assigned when filed".

Step 2: Add expense lines

Add one line per expense; the **Add expense line** window shows the line total at the bottom as you type.

Pick the category by what you paid for; each has its own steps further down.

Category	Use it for	R47 column	What you enter
Meals	Breakfast, lunch, dinner or an overtime meal	MEALS	Tick the meals; the amount fills in from your rates
Transportation	Rides: taxi, Grab, Angkas, jeepney, bus, train, ferry	TRANSP.	One fare leg per ride: **Mode**, **From**, **To**, **Fare**
Toll	Expressway toll fees	TOLL	The amount on the toll receipt; **Multiplier** for the same toll paid again
Parking	Parking fees	PARKING	The amount on the parking ticket

A **Foreign** expense goes in the **Oth** column whatever its category. Without an **Invoice / OR no.**, the line total is rounded to whole pesos.

1. In the report editor, click **Add expense line** (on a report that already has lines, the button reads **Add line**). The **Add expense line** window opens.
2. Set the **Date** of the expense and choose **Local** or **Foreign**.
3. Click a category: **Meals**, **Transportation**, **Toll**, **Parking**, **Others** or **Representation**. The window shows which R47 column the line goes into.
4. Fill in **Particulars** (what it was, e.g. *SUCAT - NICHOLS*), **Location** (e.g. *MDMPI, CALMC*) and **Work with** (who you were with or the client; lines are grouped by it on the R47, which prints initials: Jay C Abaoag becomes JCA).
5. Complete the part for your category (each category has its own steps below):
    - **Allowance by the day:** tick **Per-diem / allowance**, enter the daily amount, the **# of days** and any **– days** taken off.
6. Check the **Amount**. Use **Multiplier** for repeated identical expenses (e.g. 2 for two trips).
7. If you have an official receipt, enter the **Invoice / OR no.**; only then can you enter a **VAT amount**.
8. Optional: **More details** holds remarks, instrument, serial no. and service no.
9. Click **Add line**. The window clears for the next line; close it when you are done.

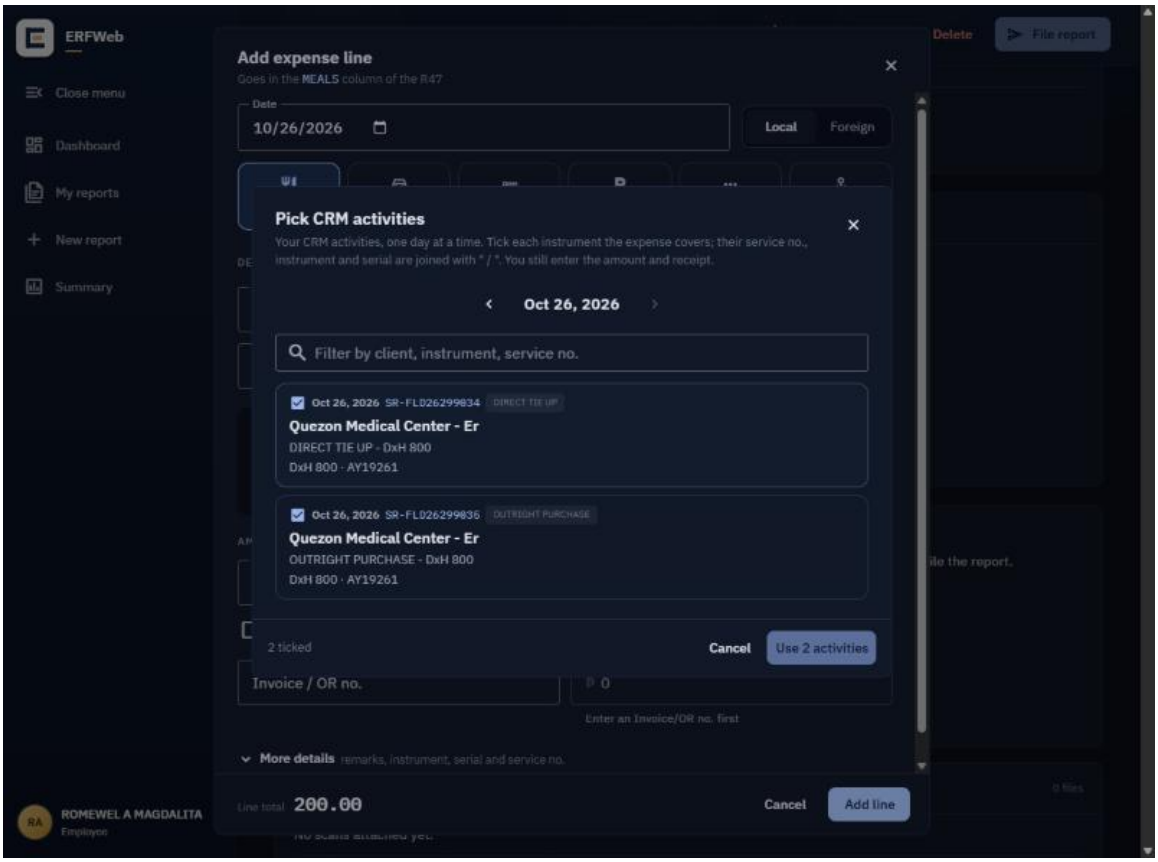

Fill a line from the CRM

If your account is linked to the CRM, you can fill a line from one of your CRM visits or service reports instead of typing it. You still choose the category and enter the amount, Invoice / OR no. and receipt.

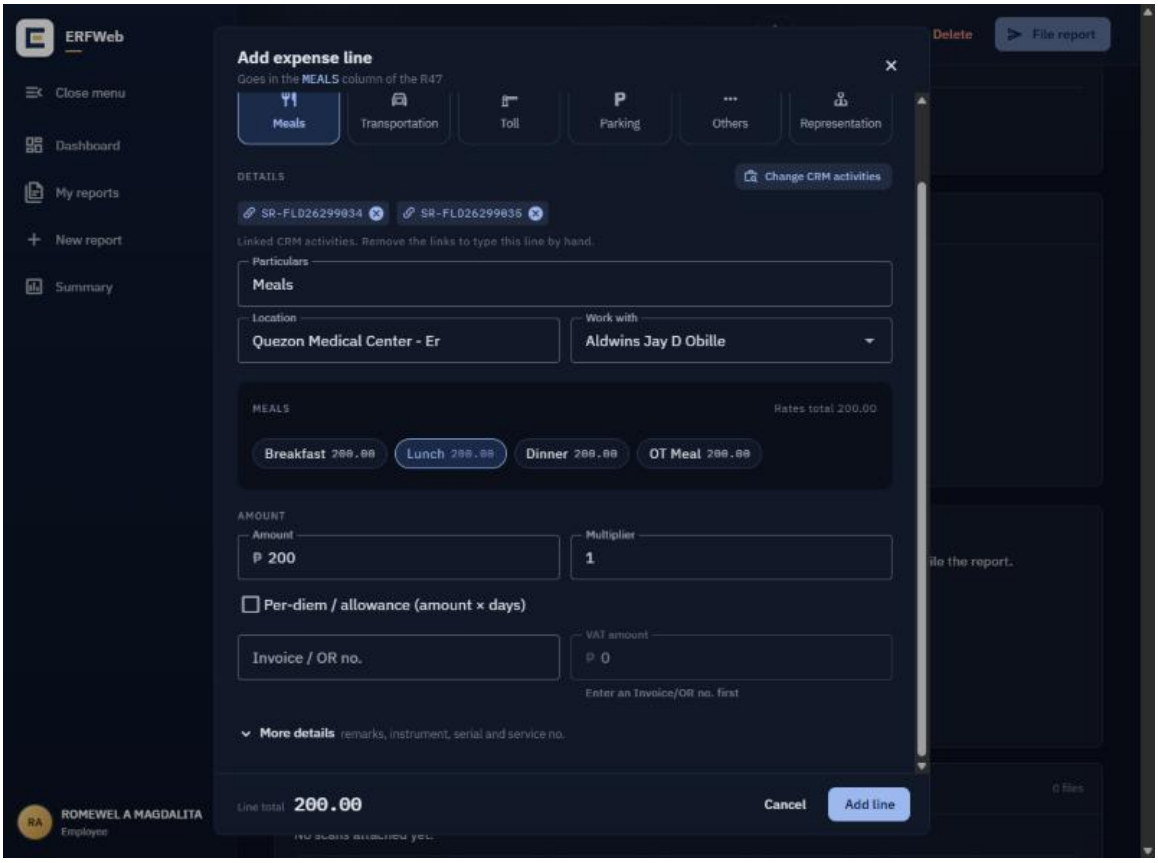

1. Set the **Date** of the expense first. The CRM list opens on that day.
2. Click **From CRM** (to the right of DETAILS). The **Pick CRM activities** window lists your CRM activities on that date: Completed ones first, then Open and Cancelled ones greyed out.
3. No activity that day? Use the **Previous day** and **Next day** arrows to step one day at a time inside the report period.
4. Optional: type in the filter box to find a client, instrument or service no.
5. Tick the activity. One visit that served several instruments has one activity each: tick them all.
6. Click **Use activity** (or **Use 2 activities**, and so on). The window closes and fills in **Date**, **Location** (the client), **Work with** (the others on the visit), and **Instrument**, **Serial no.** and **Service no.**

under **More details**, several joined with " / ". On a Transportation line it also fills the first fare leg's **From** and **To**.

7. Choose the category and finish the line as described below. **Particulars** keeps the category's default text; every field stays editable.

The line now shows a chip for each activity (ITI-… for a sales visit, SR-… for a service report). Click **Change CRM activities** to pick again, or the × on a chip to unlink it; with no chips left it is an ordinary typed line.

You can use one activity for several lines of the same report, such as the meal and the fare of one visit, but not on another report.

What you see on an activity	What it means
Greyed out, **Open**, "Not completed in the CRM yet. Complete it there to claim it."	Mark the visit or service report complete in the CRM, then click **From CRM** again
Greyed out, **Cancelled**, "Cancelled in the CRM"	Cancelled work cannot be claimed
Greyed out, "Already claimed on ERF-…"	It is on another of your reports
"Used on 1 line of this report"	Information only; you can still pick it for another line
Work-with chip	Another engineer's service report that lists you; you claim your own expenses
Multi-day chip	The work ran over more than one day

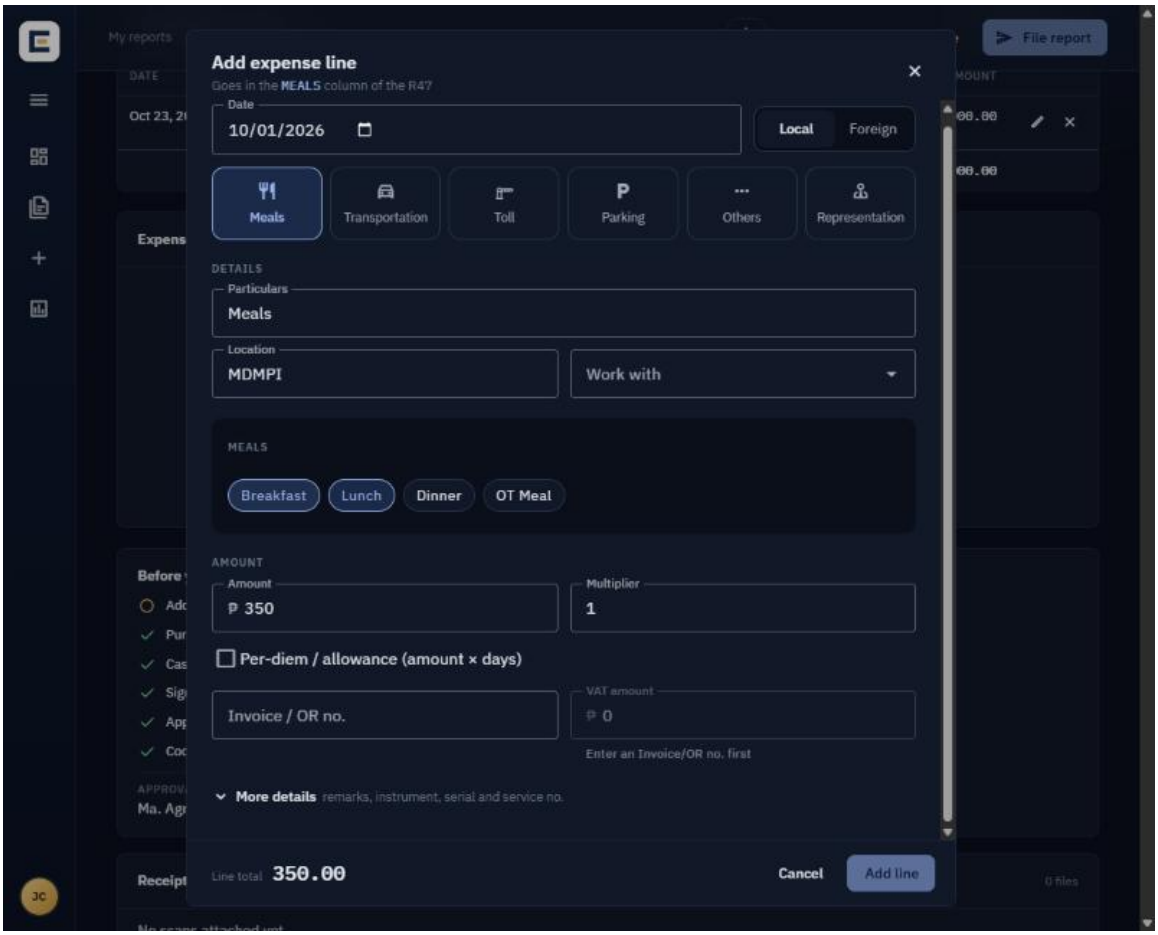

No **From CRM** button means your account is not linked to the CRM; ask your administrator. "No CRM activities on this date." means the CRM has nothing for you that day: check the **Date**.

Meals

A meal goes in the **MEALS** column of the R47 (a **Foreign** meal goes in **Oth**).

1. Set the **Date** and click **Meals**. **Particulars** reads *Meals* and **Lunch** is already ticked.
2. Fill in **Location** and, if you ate with someone or a client, **Work with**.
3. Under **MEALS**, tick each meal you are claiming: **Breakfast**, **Lunch**, **Dinner**, **OT Meal**. Each one shows your rate for that date.
4. The **Amount** fills in with the total of the ticked meals (**Rates total** shows it). If no rate shows, type the amount yourself.
5. If you have an official receipt, enter the **Invoice / OR no.** and then the **VAT amount**.
6. Click **Add line**.

Rates follow the **Date**: change the date and the rates change with it. A Meals line with Breakfast and Lunch ticked:

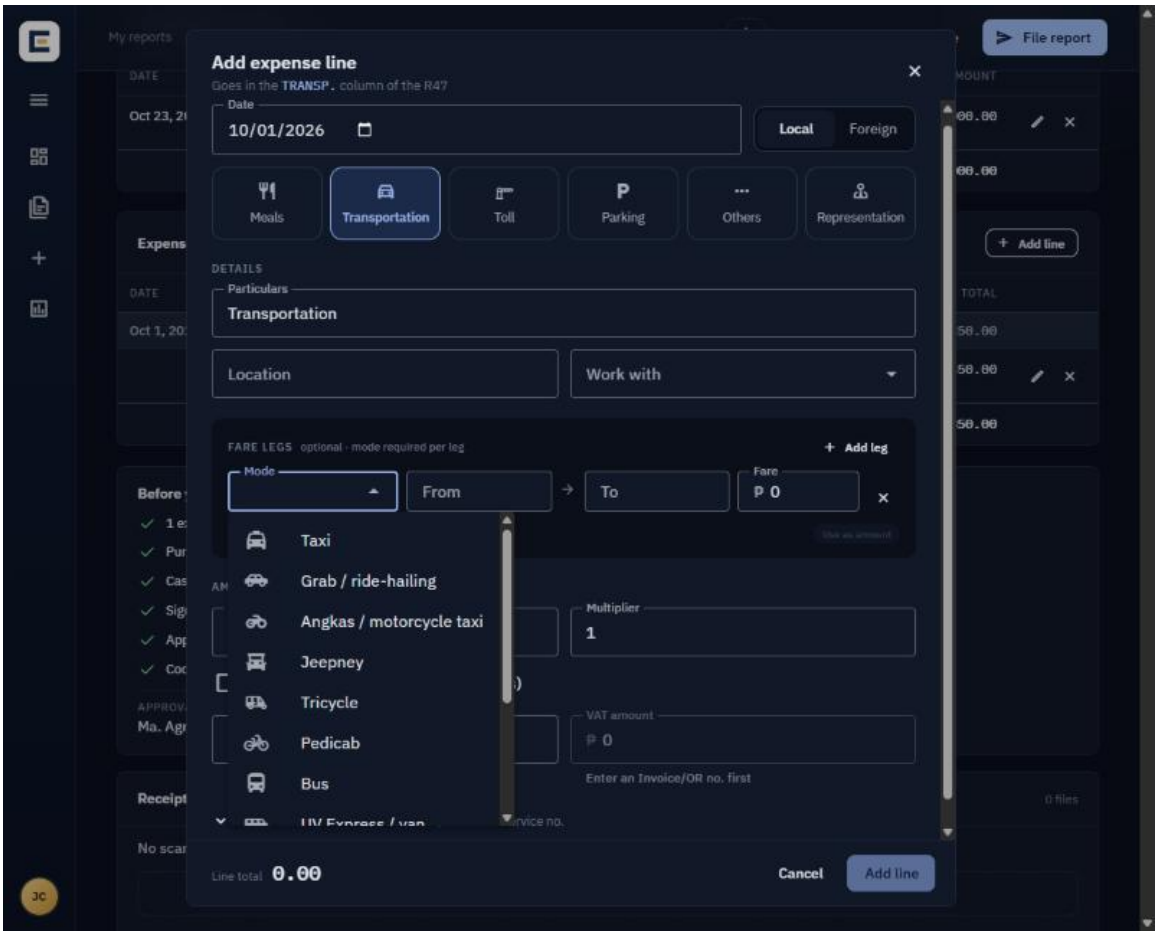

Transportation

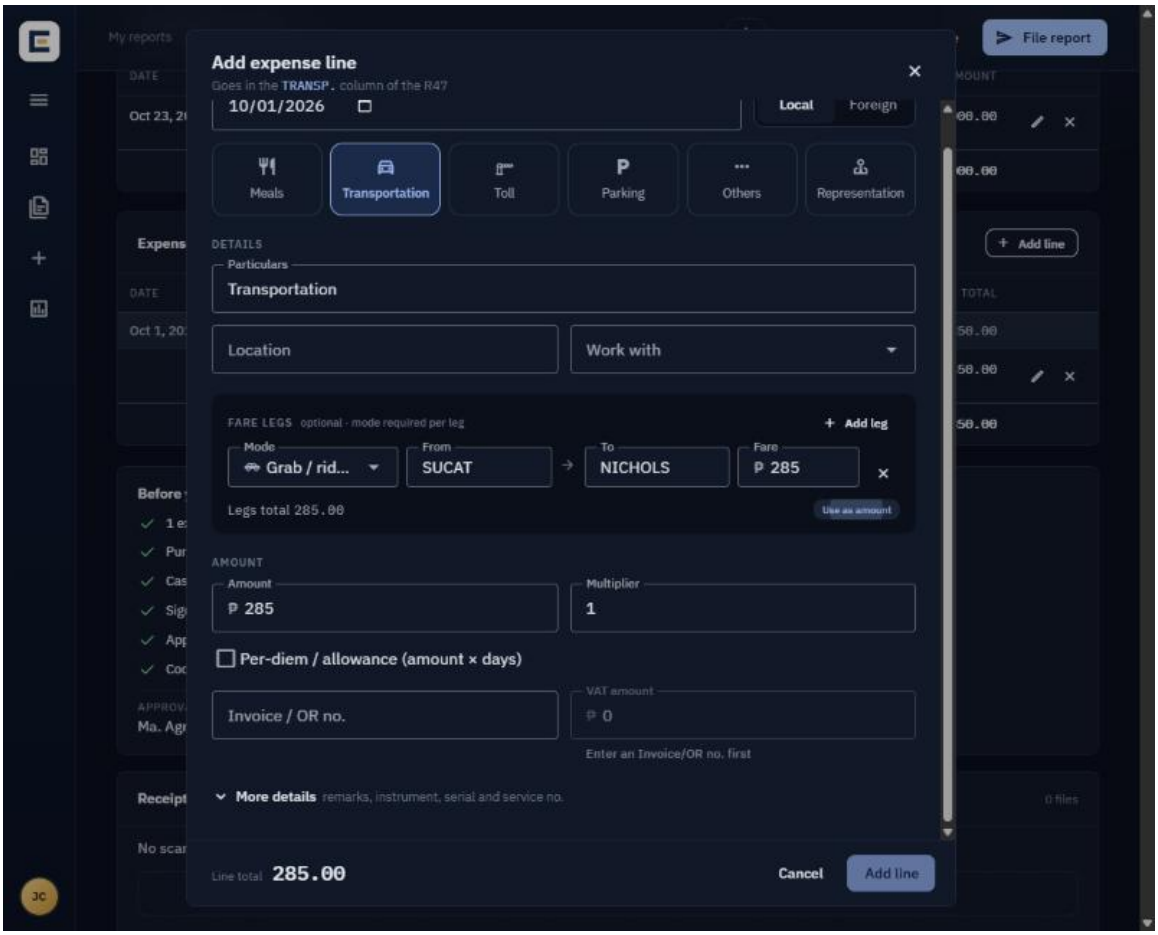

Fares go in the **TRANSP.** column of the R47 (**Oth** when **Foreign**). One line can hold all the rides of one trip, each as a fare leg.

1. Set the **Date** and click **Transportation**. **Particulars** reads *Transportation*; change it to the route, e.g. *SUCAT - NICHOLS*. One empty fare leg is ready.
2. Fill in **Location** and **Work with** if needed.
3. For each ride, under **Fare legs**:

    a. Choose the **Mode**: Taxi, Grab / ride-hailing, Angkas / motorcycle taxi, Jeepney, Tricycle, Pedicab, Bus, UV Express / van, MRT / LRT / train, Ferry / boat, Habal-habal or Others (specify). For **Others (specify)**, type the mode in **Specify the mode**.
    b. Enter **From**, **To** and **Fare**.
    c. Click **Add leg** for the next ride. It starts where the last one ended, with the same mode.
4. Click **Use as amount** to copy the **Legs total** into **Amount**, or type the amount.
5. If you have a receipt (usual for taxi, Grab, Angkas, bus and ferry), enter the **Invoice / OR no.** and then the **VAT amount**.
6. Click **Add line**.

Every leg you fill in needs a **Mode**; the line will not save until each has one ("Choose a mode"). Remove an unused leg with its ×. If you used **From CRM**, the first leg's **From** and **To** come from the CRM: the previous client of the day and this client. The day's first visit has no From, so type where you started (home or office). Pick the mode for each leg first:

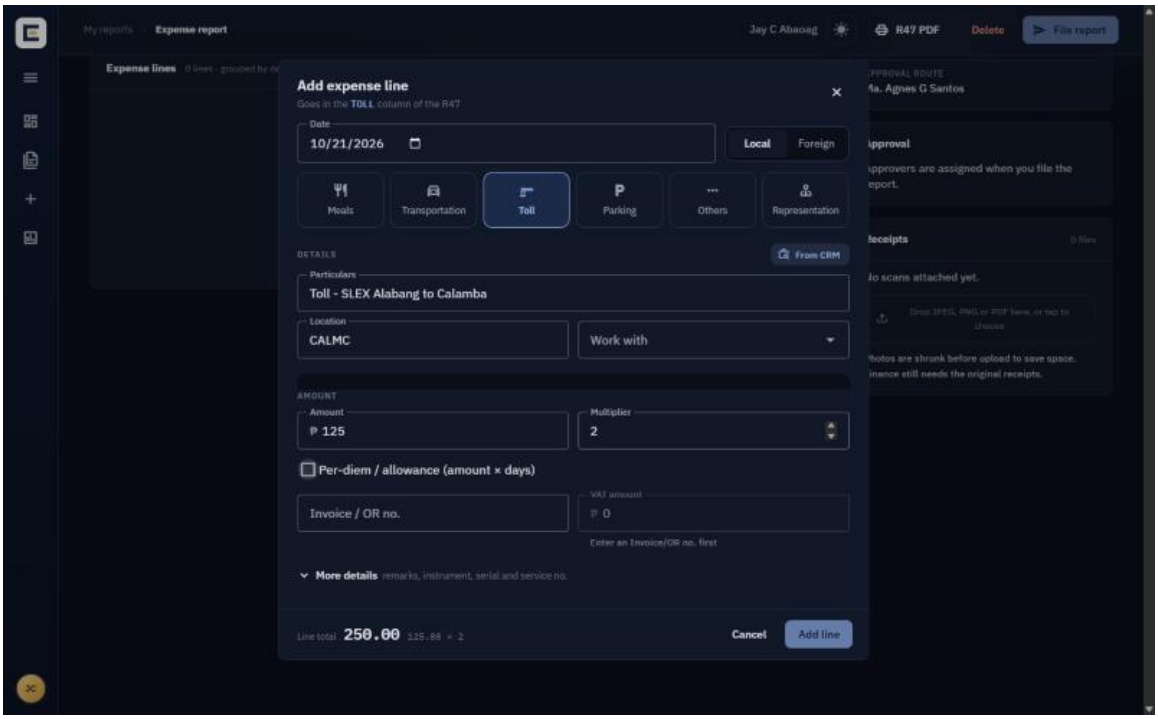

Toll

Toll fees go in the **TOLL** column of the R47 (**Oth** when **Foreign**).

1. Set the **Date** and click **Toll**. **Particulars** reads *Toll*; add the expressway or toll plazas, e.g. *Toll - SLEX Alabang to Calamba*.
2. Fill in **Location** (where you were going) and **Work with** if needed.
3. Enter the **Amount** from the toll receipt. For the same toll paid more than once, enter one amount and set **Multiplier** (e.g. 2 for there and back).
4. If the receipt has an OR number, enter the **Invoice / OR no.** and the **VAT amount**.
5. Click **Add line**.

A Toll line for the same toll paid twice, ₱125 × 2:

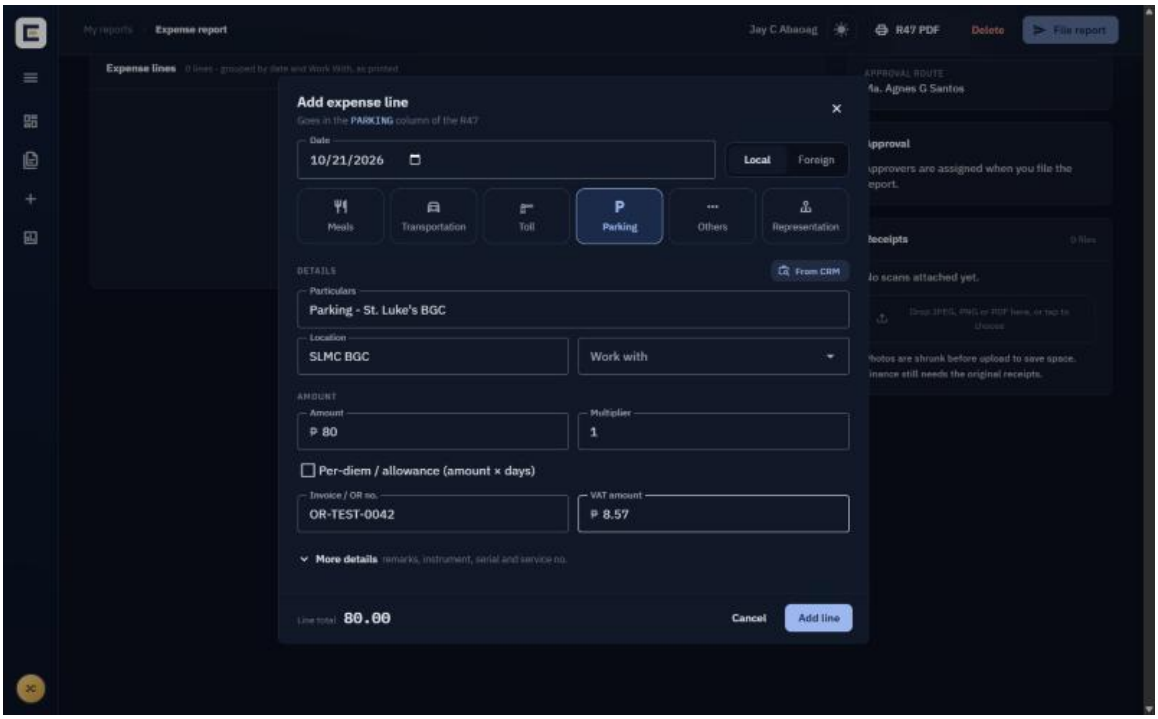

Parking

Parking fees go in the **PARKING** column of the R47 (**Oth** when **Foreign**).

1. Set the **Date** and click **Parking**. **Particulars** reads *Parking*; add where you parked, e.g. *Parking - St. Luke's BGC*.
2. Fill in **Location** (the client or site) and **Work with** if needed.
3. Enter the **Amount** from the parking ticket.
4. If the ticket is an official receipt, enter the **Invoice / OR no.** and the **VAT amount**.
5. Click **Add line**.

A Parking line with an official receipt, so the VAT amount can be entered:

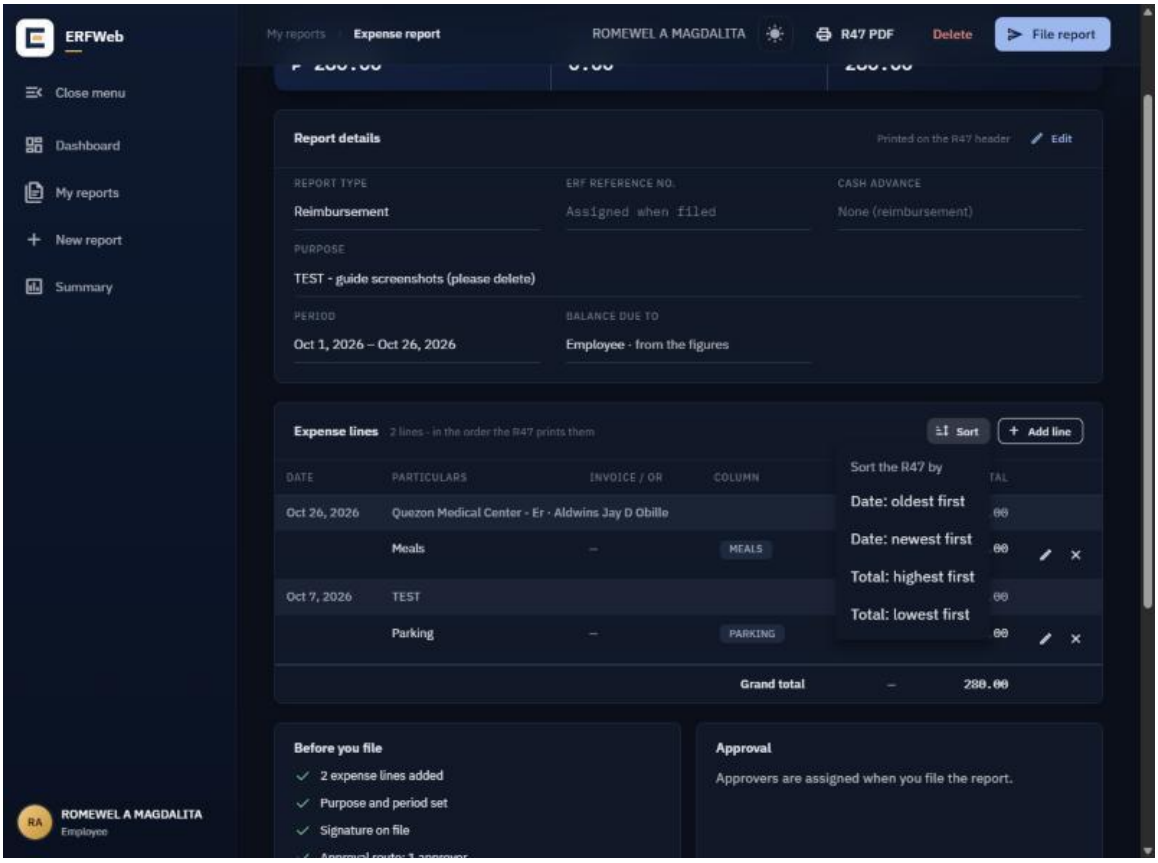

For a toll or parking fee on a CRM visit, click **From CRM** first: it fills the date, client and service details, and you only add the amount.

To change a line, open it from the expense lines table and click **Save line**. Lines with an OR number keep centavos; other lines round to whole pesos.

Put the lines in R47 order

The R47 prints lines in the order the **Expense lines** card shows them. To reorder them:

1. Click **Sort** on the **Expense lines** card.
2. Under **Sort the R47 by**, pick **Date: oldest first**, **Date: newest first**, **Total: highest first** or **Total: lowest first**.

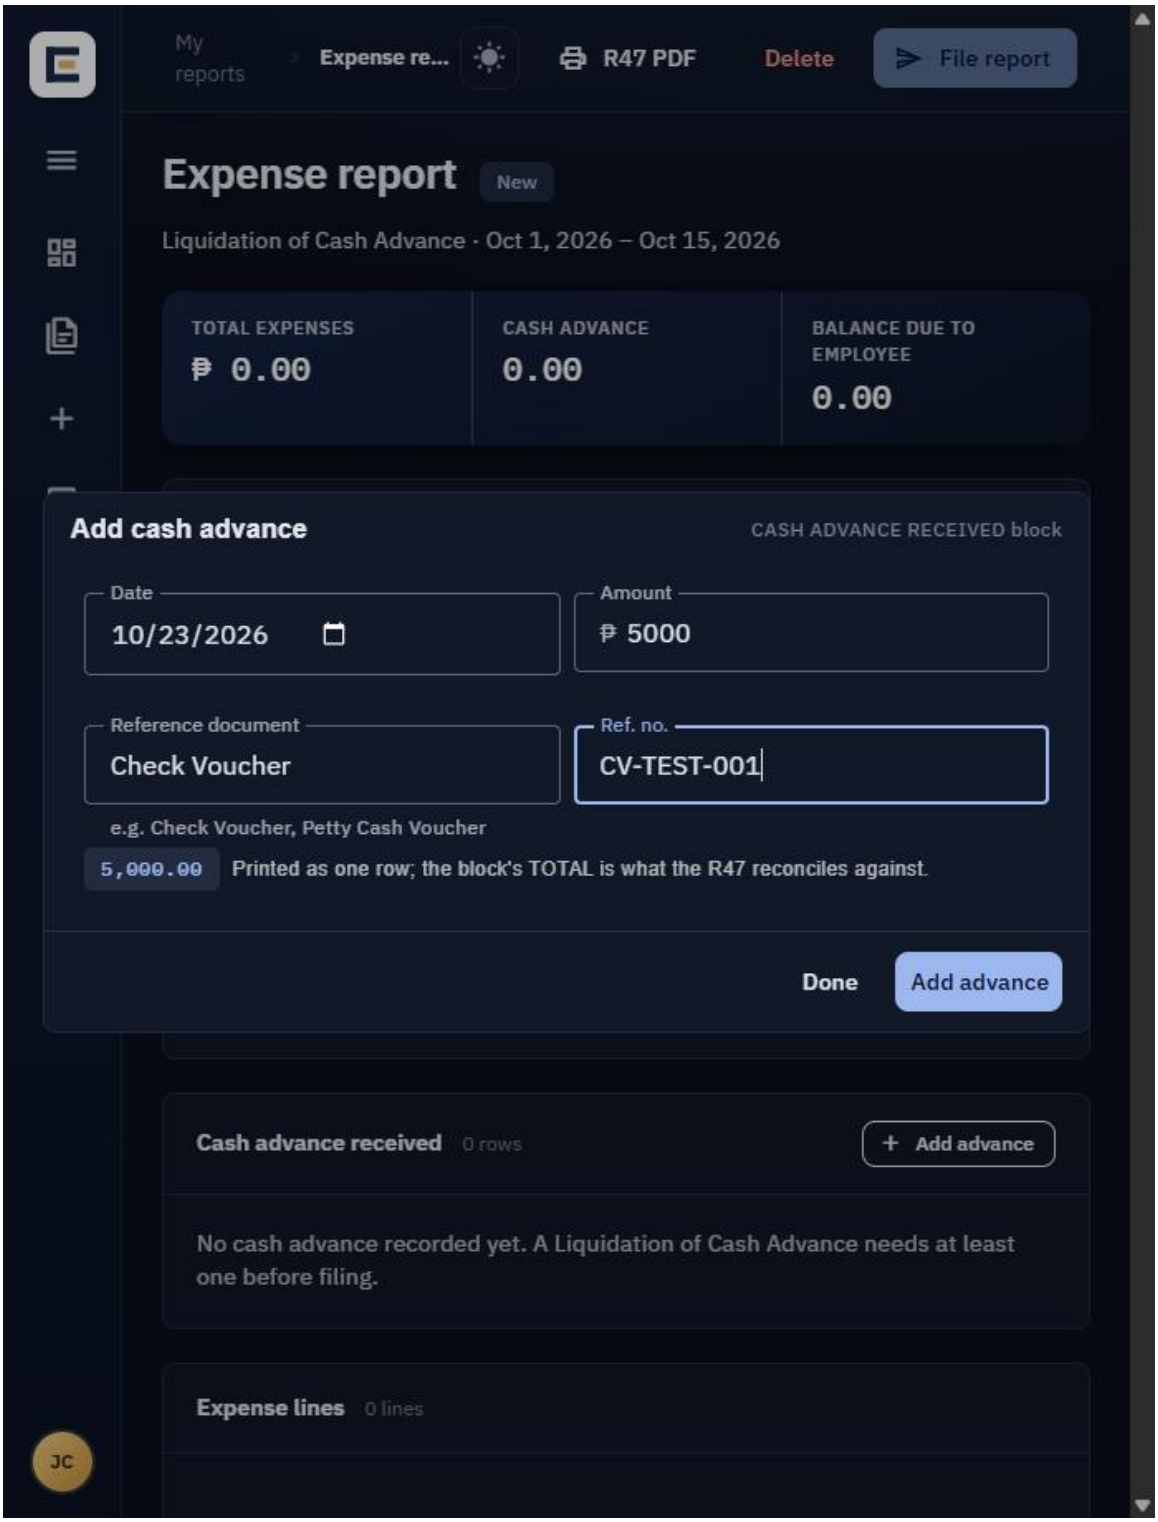

The new order is saved (*Line order saved. The R47 prints in this order.*). Lines of the same date, location and Work with stay together.

Step 3: Record cash advances (Liquidation only)

Only a Liquidation of Cash Advance needs this step; a Replenishment's fund amount was entered in Step 1, and a Reimbursement has neither.

1. In the **Cash advance received** card, click **Add advance**.
2. Enter the **Date** and **Amount** you received, the **Reference document** (e.g. Check Voucher, Petty Cash Voucher) and the **Ref. no.**
3. Click **Add advance**. Repeat for each advance, then click **Done**.

The R47 compares your advances with your expenses: unspent advance is due to MDMPI, spending beyond it is due to you.

Step 4: Attach receipts

Upload a scan or photo of every receipt in the **Receipts** card.

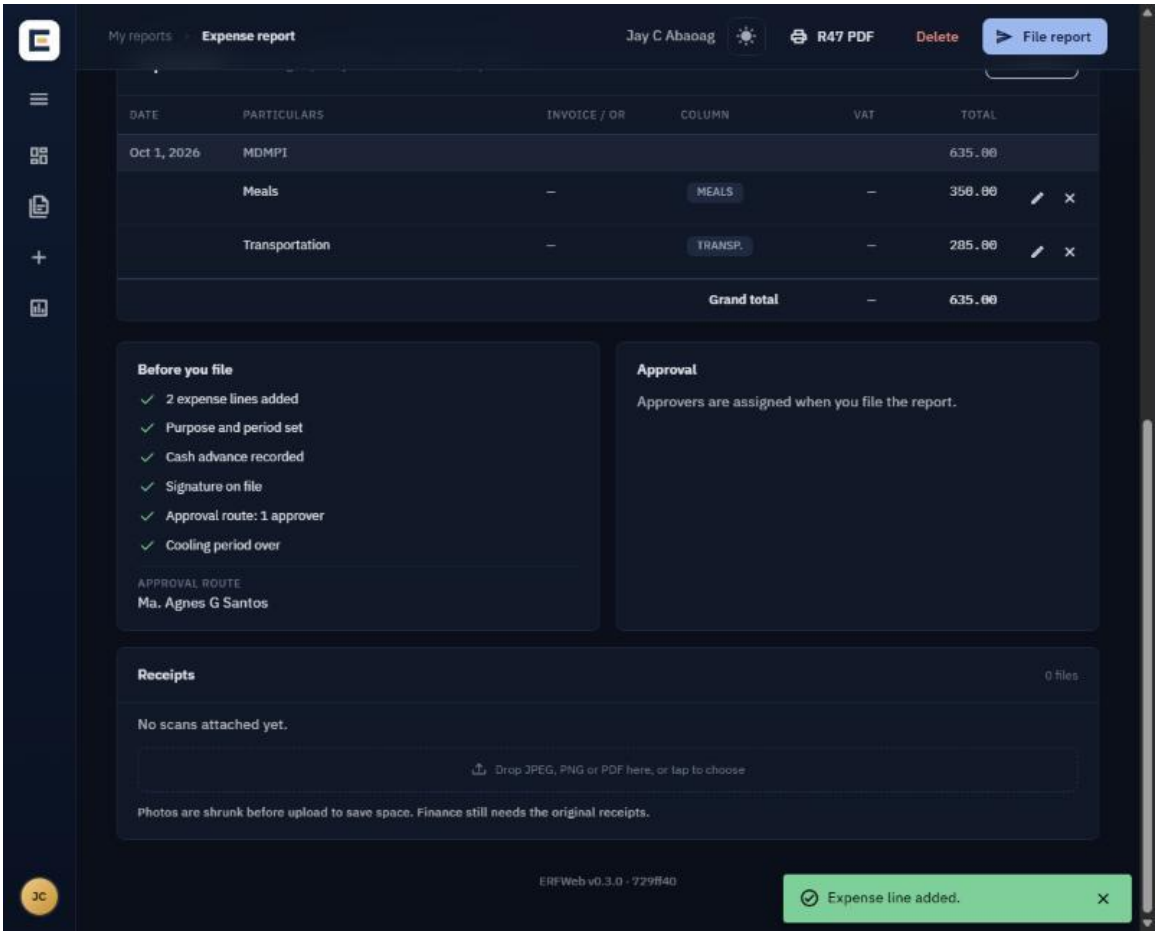

1. Drag JPEG, PNG or PDF files onto the box, or click it to choose files (on a phone, tap it to take or pick a photo).
2. Each file appears in the list; click its name to check it, or the **×** to delete it.

The Receipts card sits at the bottom of the report; it is shown in the Step 5 screenshot.

Uploads are a copy only: you must still give the **original receipts to Finance** after the report is approved.

Step 5: Check the list and file

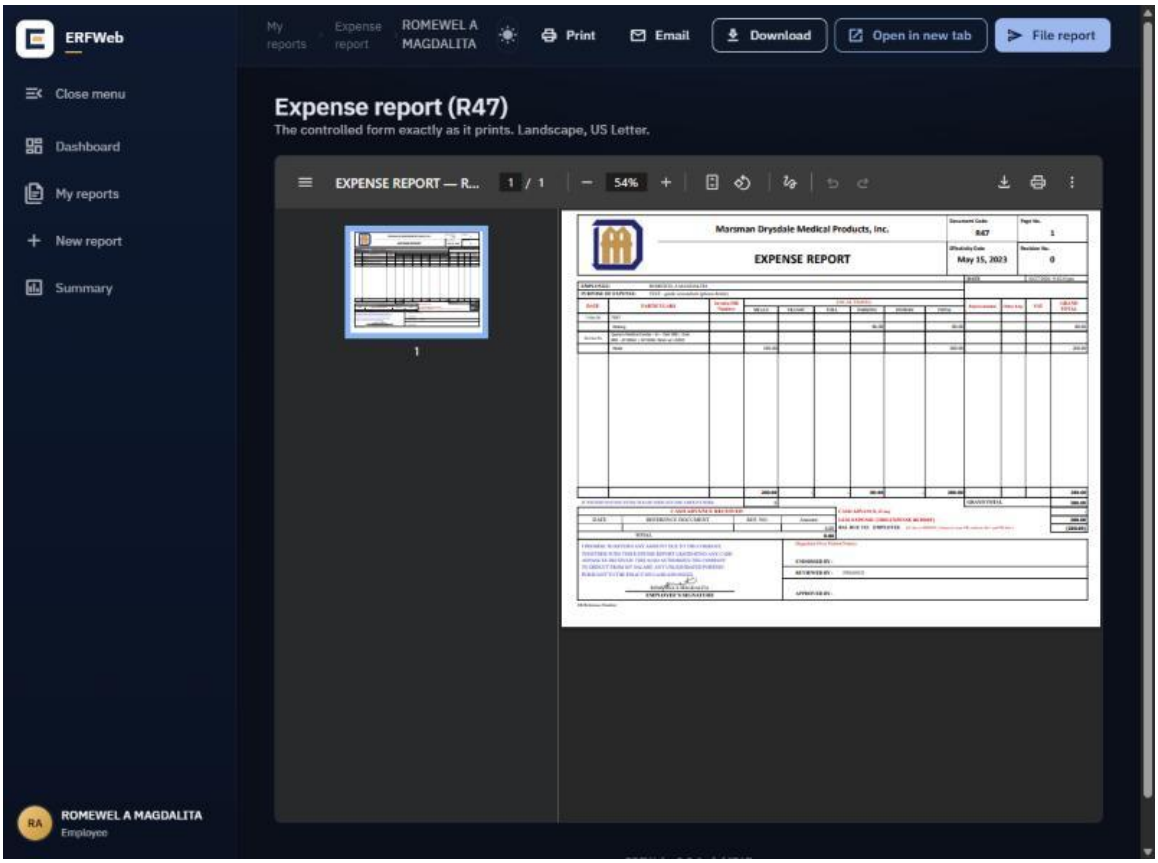

The **Before you file** card shows every requirement: green ticks are done, amber circles still need attention, and a grey dash is optional. **File report** stays disabled until every item is green or grey.

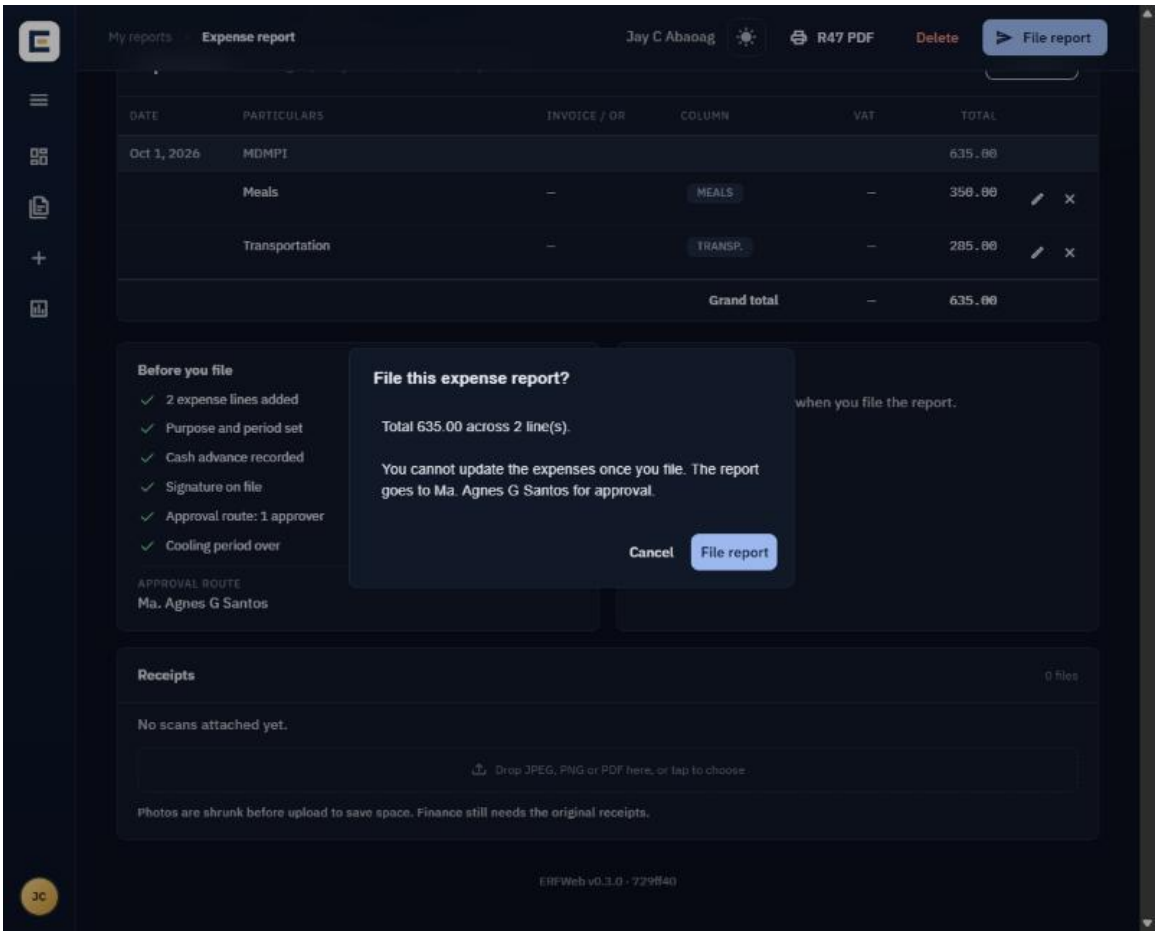

What the item says	What to do
Add at least one expense line	Add a line (Step 2)
Set the purpose and period	Fill in Purpose, Date from and Date to (Step 1)

What the item says	What to do
Add at least one cash advance **(Liquidation)**	Add an advance (Step 3)
Enter the revolving fund amount **(Replenishment)**	Enter it in the report details (Step 1)
No signature on file (optional; sign the printed R47), in grey	Nothing; you can still file. Sign the printed R47 you hand to Finance
No approval route is configured for you	Ask your administrator to set your approvers
Account cooling period ends (date and time)	Wait until then

1. Check the **Approval route** line at the bottom of the card; it names who will approve, in order.
2. Open **R47 PDF** to see the printed form first. Its File report button brings you back to this checklist and the same confirmation.
3. Click **File report**, read the total in the confirmation, then click **File report** again.

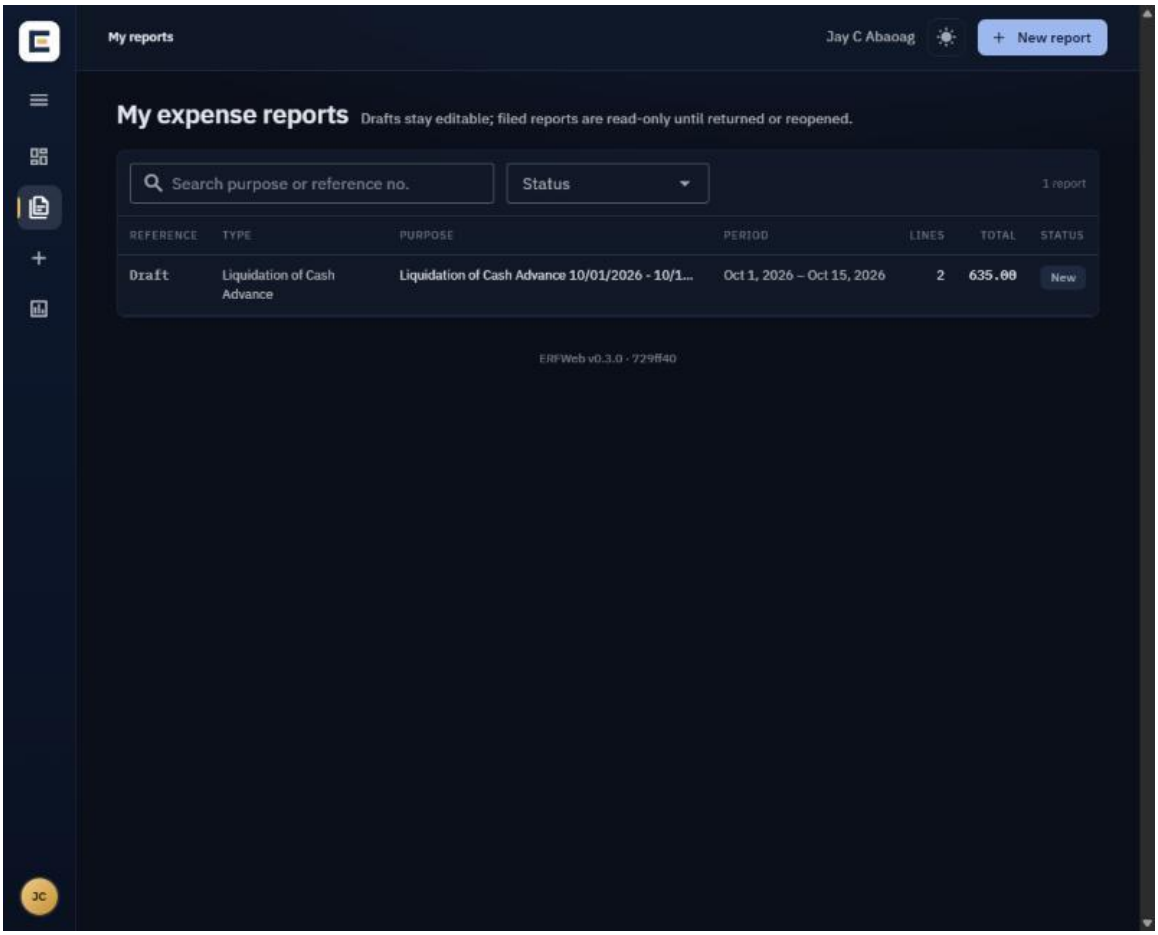

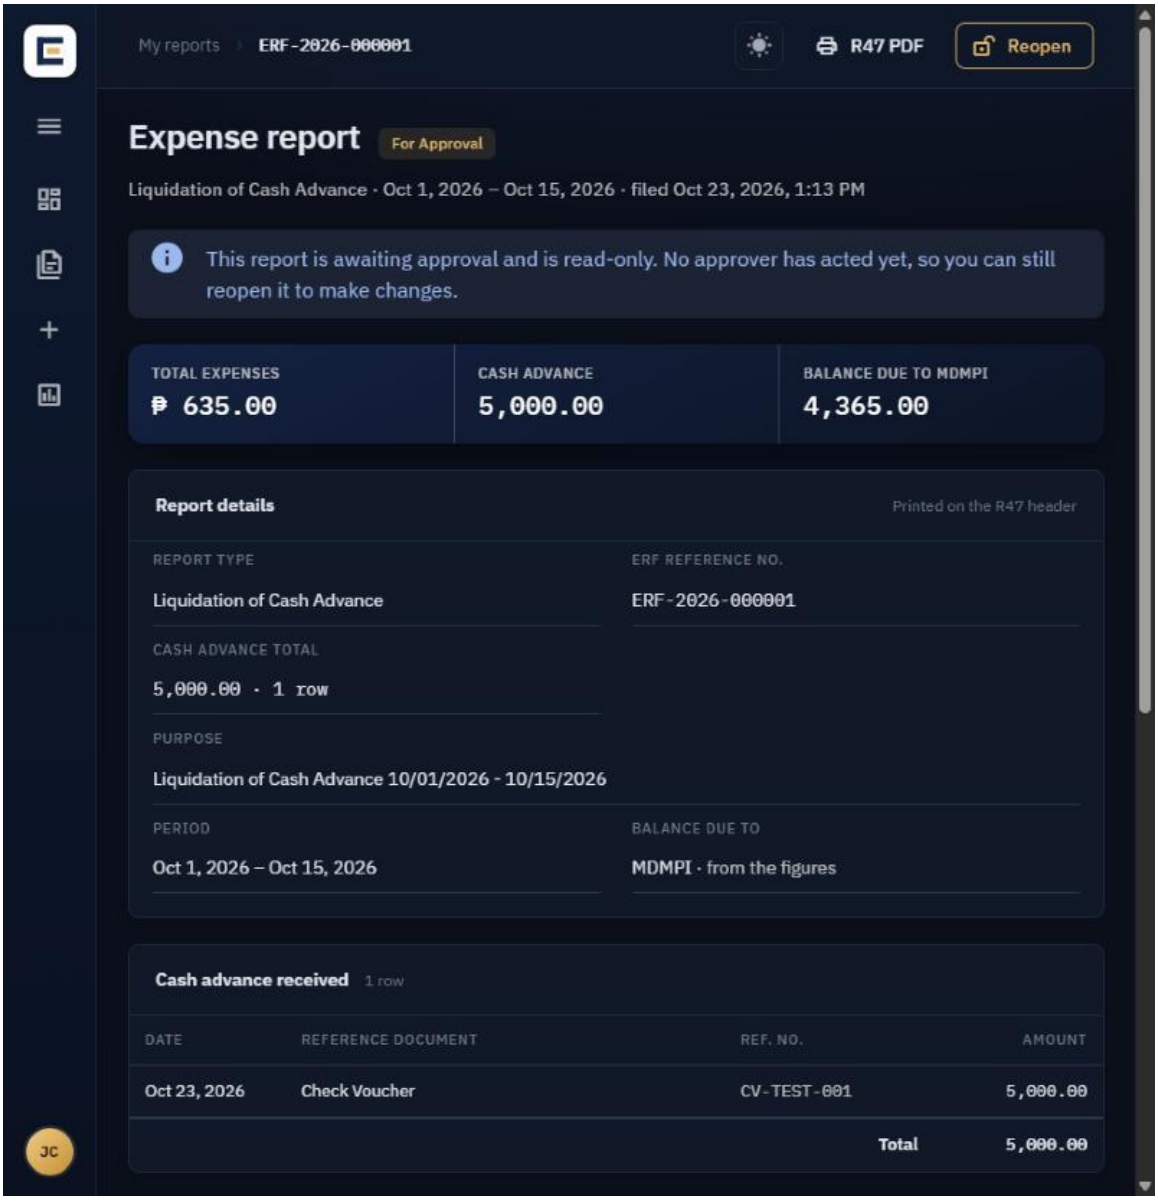

You cannot change expenses once you file. ERFWeb assigns the ERF reference number, shows *Filed. Awaiting approval by …*, and texts and emails you and your approvers.

After filing

Follow your report under **My reports**; open it to see the approval timeline. You get an SMS and an email at each approval, return or rejection.

Once filed, the report shows its ERF reference number and **For Approval**, and can still be reopened until the first approver acts:

Status	What it means	What you do
For Approval	Waiting for your approvers	Wait; you may **Reopen** it only until the first approver acts
Returned	An approver sent it back with a note	Read the note, fix the report, click **Re-file report**
Approved	All approvers signed	Hand the original receipts to Finance
Rejected	Final decision	Nothing; it cannot be re-filed

- **Reopen:** puts a filed report back to draft so you can change it; approval starts again from the first approver.

- **R47 PDF:** view, print or download the form, or **Email** it to yourself and your approvers. Your signature prints only after Finance has approved it, always with an ELECTRONIC SIGNATURE watermark; otherwise your place reads "Electronically filed" with the date and time.
- **Delete:** only drafts that were never filed can be deleted.

If Finance asks for a line to be verified

After approval, Finance can ask an Expense Verifier to check one line before it clears the report for payment. You get an SMS and an email naming the line, and a **Verification** card appears on your report:

Status on the card	What it means
Waiting for a verifier	Nobody has picked it up yet
Being verified	A verifier is checking the line
Not verified: waiting for Finance	Finance decides whether to ask your Level 2
With Level 2 for a decision	Your Level 2 decides
Closed	Done; the finding or decision shows on the card

You hear again by SMS and email when the check closes or when Level 2 decides. If Level 2 returns the report, fix it and click **Re-file report**. Payment waits until every check is closed.

Common problems

What you see	What to do
File report is greyed out	Look for amber items in **Before you file** (Step 5)
"No approval route is configured for you"	Ask your administrator to set it up
"No signature on file" in grey	Nothing; it does not stop filing. Sign the printed R47, or ask your administrator to upload your signature
Meal rates show nothing or zero	Your rates are not set for that date; ask your administrator
"Choose a mode" on a fare leg	Pick the Mode for every leg you filled in
VAT amount is greyed out	Enter the Invoice / OR no. first
The page reloads after you save	Someone changed the report at the same time; redo your last change
Cannot edit a filed report	Reopen it (before an approver acts) or ask your approver to return it
"Too many failed sign-in attempts"	Wait 15 minutes, or ask the administrator to reset your password

Still stuck? Send the ERFWeb administrator the time, your report's reference number and any error shown on screen.
