ERFWeb Finance Guide

Nov 5, 2026 · @Jay Bryan

Finance takes over once a report is fully approved: record the original receipts, check doubtful lines, and clear the report for payment.

Before you start

Sign in at the ERFWeb address with your ER System username and password, in Chrome or Edge. The left menu shows **Budgets**, **Finance queue** and **Signatures** under Work queues, plus **Summary**.

- A report reaches Finance only after its last approval. Drafts and reports still For Approval never appear here.
- Finance never rejects a report on its merits. A doubtful line goes to an Expense Verifier, and a line that fails goes to Level 2 to decide.
- You never process your own report: it shows **Your report** and its buttons are off.
- Every action is recorded in the audit trail, which Finance can read under **Audit**.

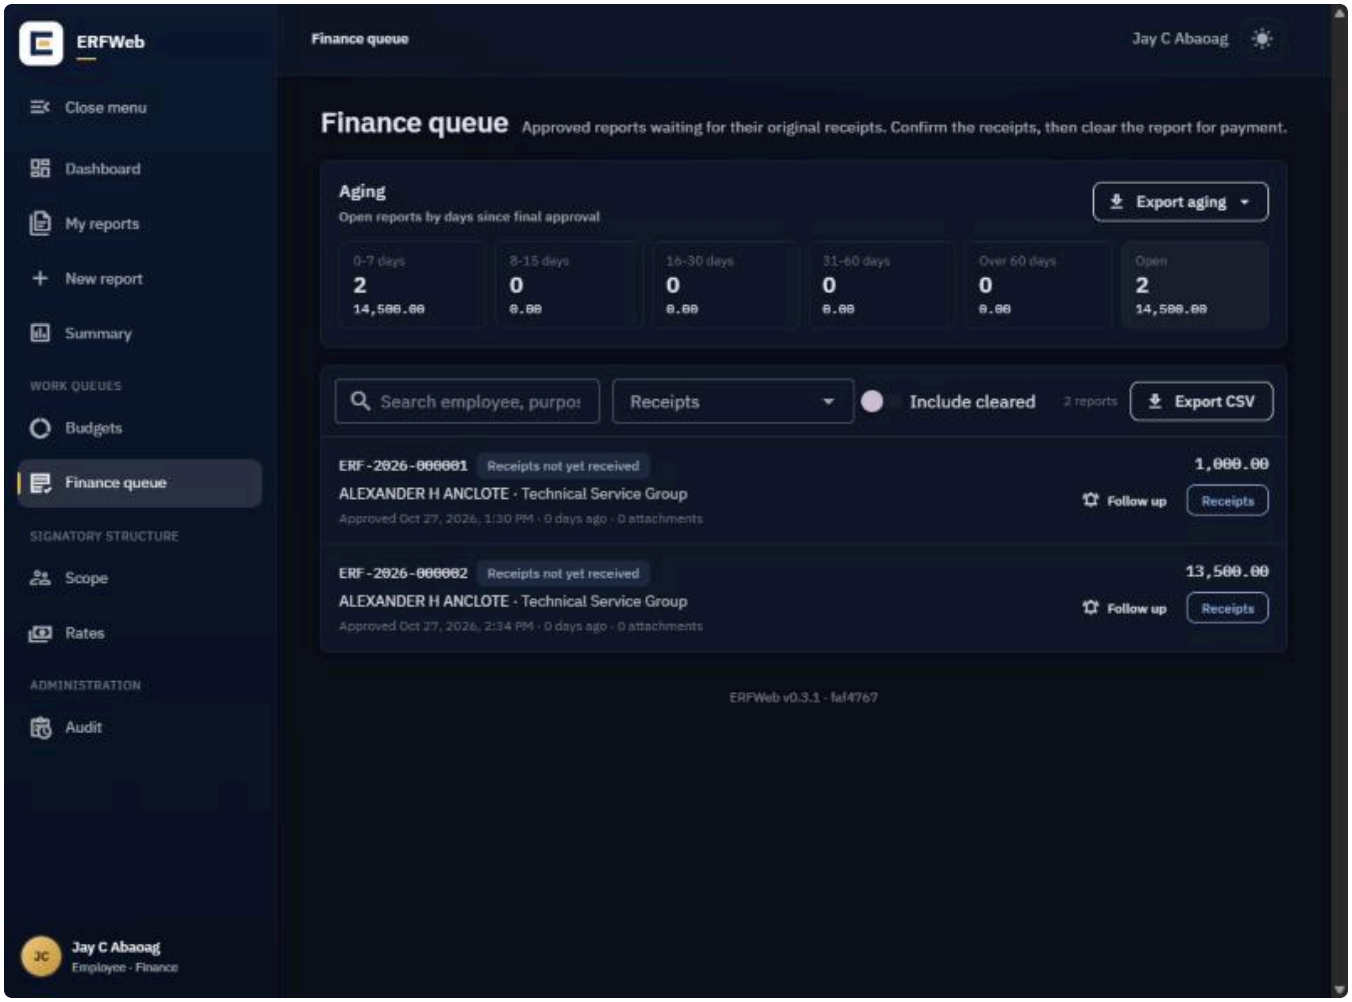

Step 1: Find reports in the Finance queue

Every fully approved report that is not yet cleared is on the **Finance queue** page.

1. Click **Finance queue** in the left menu.
2. Type in **Search employee, purpose or reference no.**, or pick a **Receipts** status to narrow the list.
3. Turn on **Include cleared** to see reports already cleared for payment.
4. Click a report to open it with its lines, receipts scans and approval timeline.

Each row shows the receipt status and, when it applies, a pill:

Pill	Meaning
Under verification	A line is with an Expense Verifier; clearing waits
Not verified: query Level 2	A verifier could not confirm a line; you send it to Level 2
Your report	Your own report; another Finance user processes it

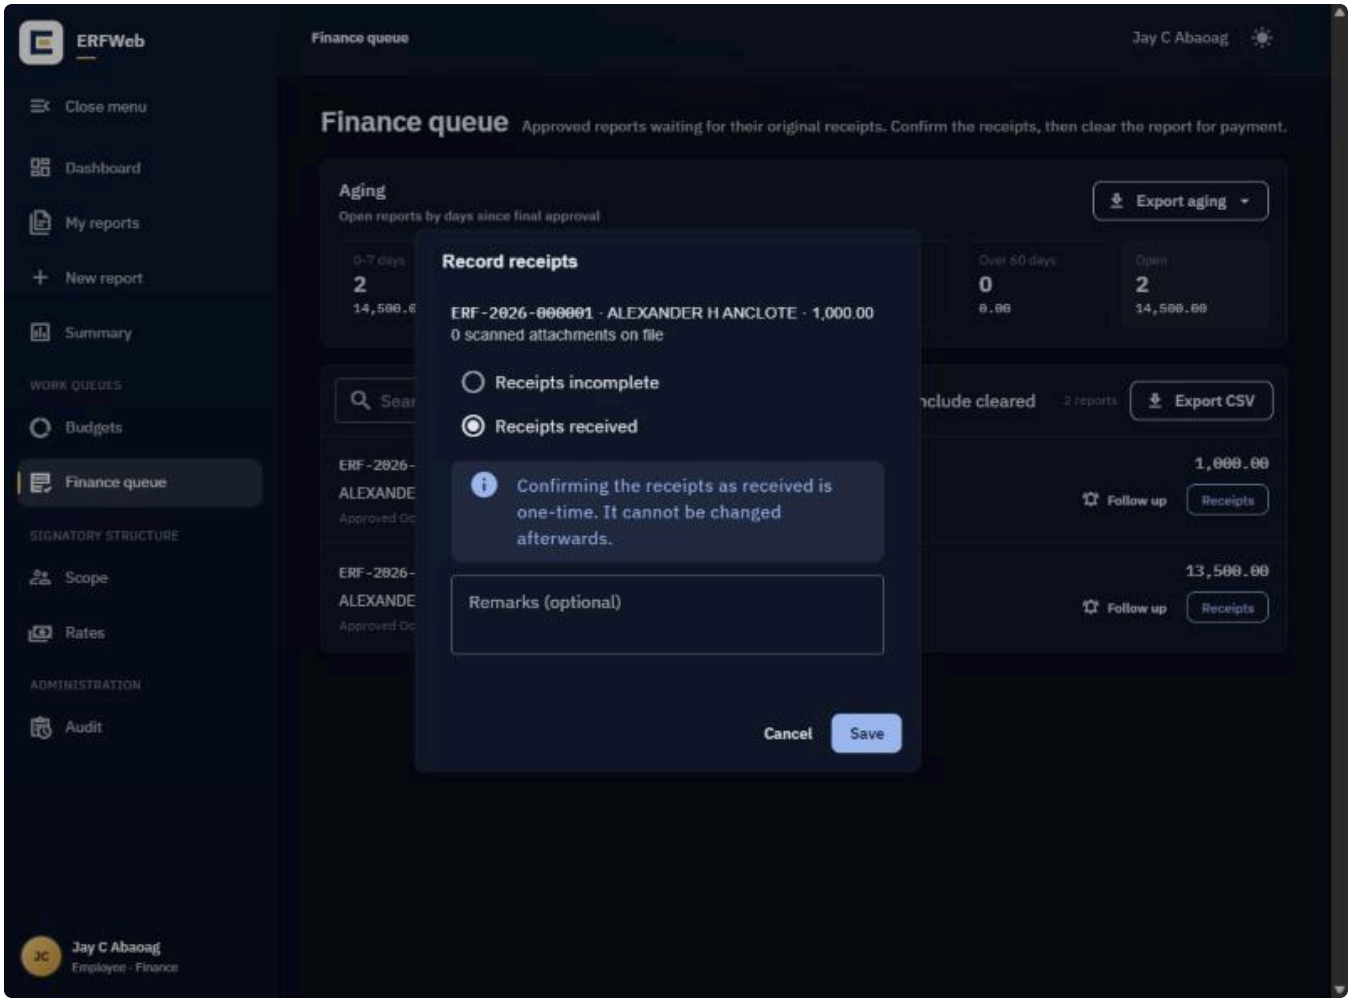

Step 2: Record the original receipts

When the employee hands in the paper receipts, record them on the report's row.

1. Click **Receipts** on the row. The **Record receipts** window opens.
2. Pick the status:
   - **Receipts received**: all originals are in. This is recorded once and cannot be undone.

- **Receipts incomplete**: some are missing. Say which ones under **Which receipts are missing?** (required).

3. Click **Save**.

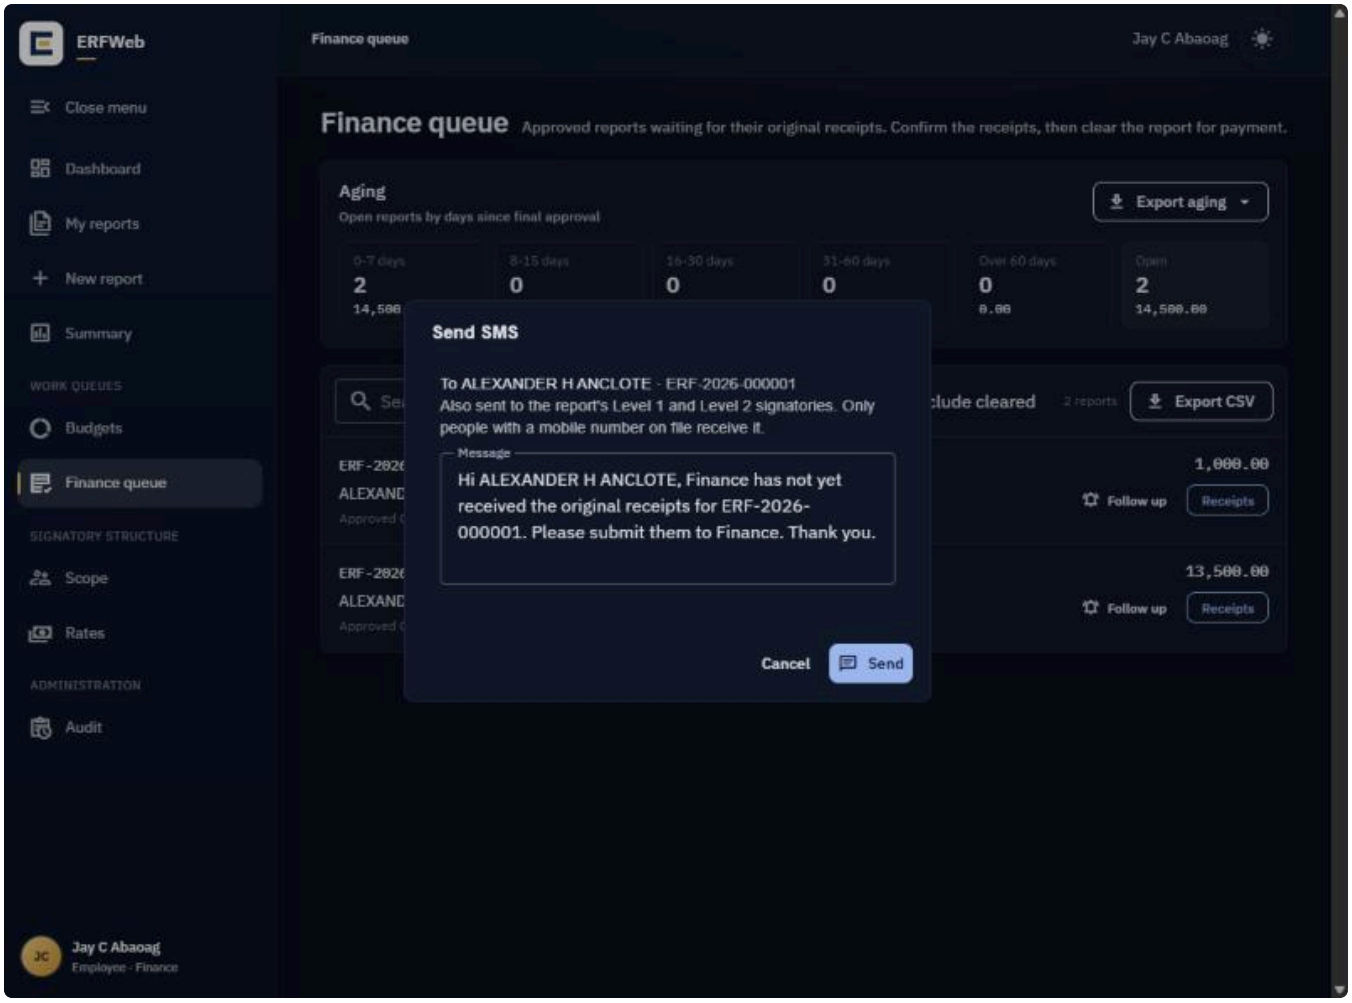

Status	Meaning
Receipts not yet received	Approved; nothing handed in yet
Receipts incomplete	Some originals missing; your remarks say which
Receipts received	All originals in; ready to clear
Cleared for payment	Done; the report leaves the open queue

Step 3: Follow up on missing receipts

While receipts are outstanding, remind the employee by SMS.

1. Click **Follow up** on the row.
2. The message is filled in for you: *Hi <employee>, Finance has not yet received the original receipts for <ERF no.>. Please submit them to Finance. Thank you.* Edit it if needed.
3. In the Send SMS window, click Send. The employee and the report's Level 1 and Level 2 signatories are texted.

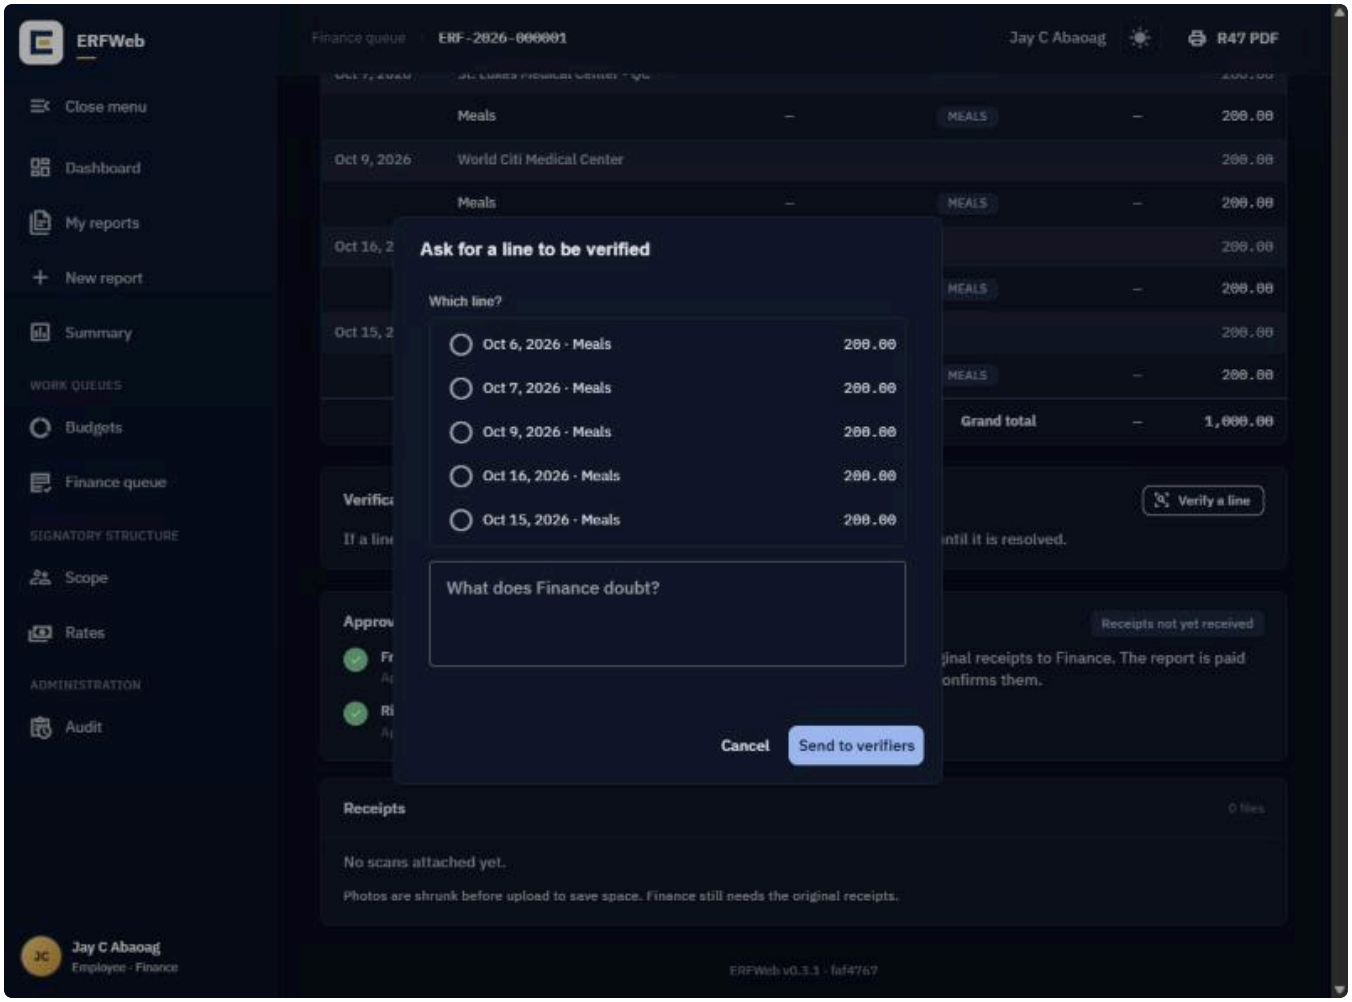

The row then counts the follow-ups and shows when the last one was sent. Sending twice by accident never texts twice.

Step 4: Ask for a line to be verified

If a line looks wrong, send it to the Expense Verifiers instead of rejecting it. You can do this any time before the report is cleared.

1. Open the report from the queue.
2. On the **Verification** card, click **Verify a line**.

3. In **Ask for a line to be verified**, pick the line under **Which line?** and say **What does Finance doubt?**
4. Click **Send to verifiers**.

The row now shows **Under verification**; you can still record receipts, but clearing waits. The verifiers and the employee are notified; your reason is never shown to the employee.

You get a text and an email when the verifier records a finding and when Level 2 decides, as long as your mobile number and email are on file.

When the verifier records a finding:

Finding	What you do
Verified, or Verified with note	Nothing; the request closes and you carry on
Not verified	The row shows **Not verified: query Level 2**. Open the report, click **Query Level 2**, say **What should Level 2 decide?** and click **Send query**

Level 2 then lets the line through (you carry on), returns the report to the employee (it leaves your queue), or rejects it (final).

Step 5: Clear for payment

A report can be cleared once its receipts are received and no verification is open.

1. Click **Clear for payment** on the row. (While a verification is open, the row says **Clear after the verification is resolved** instead.)
2. In **Clear this report for payment?**, add **Remarks (optional)**.
3. Click **Clear for payment**.

Clearing is final. The report leaves the open queue; turn on **Include cleared** to see it again.

Approve signatures

A signature image prints on the R47, with an ELECTRONIC SIGNATURE watermark, only after Finance approves it. The System Administrator loads each signature; you check it here.

1. Click **Signatures** in the left menu. The **Waiting for approval** tab lists new and replaced signatures.
2. Check that the image is the person's signature and is clear.
3. Click **Approve**. The R47 prints it from then on.
4. Or click **Reject**, add a **Reason (optional)** and click **Reject and remove**. The image is deleted, and the System Administrator must load a new one.

- Your own signature shows **Your own: another Finance user approves it**.
- Until a signature is approved, the R47 prints "Electronically approved" with the date and time in its place.
- A replaced signature comes back to **Waiting for approval**.

- The **Approved** tab lists approved signatures with who approved them and when.

Aging, summaries, budgets and exports

Where	What it shows	Export
Aging card on the Finance queue	Open reports by days since final approval: 0–7, 8–15, 16–30, 31–60, over 60	**Export aging** (CSV or PDF)
Finance queue list	The reports for your current search and filters	**Export CSV**
Summary	Expenses by expense date for everyone (scope All), by department, approved only or not	CSV or PDF
Budgets	Every cost center's yearly budget, used, remaining and % used; for monitoring only	**Export** (CSV)

Exports are capped at 10,000 rows and are recorded in the audit trail.

Common problems

What you see	What to do
A report you expect is not in the queue	It is not fully approved yet, or it is cleared: turn on **Include cleared**
No **Clear for payment** button	Record **Receipts received** first
Clear after the verification is resolved	Wait for the verifier's finding; if it is Not verified, query Level 2
Save stays off in Record receipts	For Receipts incomplete, say which receipts are missing
A message that the report changed	Someone else acted on it; the page reloads, check it and try again

What you see	What to do
Follow up fails	The employee has no mobile number on file; ask the System Administrator
Your report, buttons off	Another Finance user must process your own report
Your own: another Finance user approves it	Another Finance user must approve your own signature
A signature you expect is not under **Waiting for approval**	It is already approved (see **Approved**), or the System Administrator has not loaded it yet
