ERFWeb Expense Verifier Guide

Nov 5, 2026 · @Jay Bryan

When Finance doubts a line on an approved report, an Expense Verifier checks it and records one finding.

Before you start

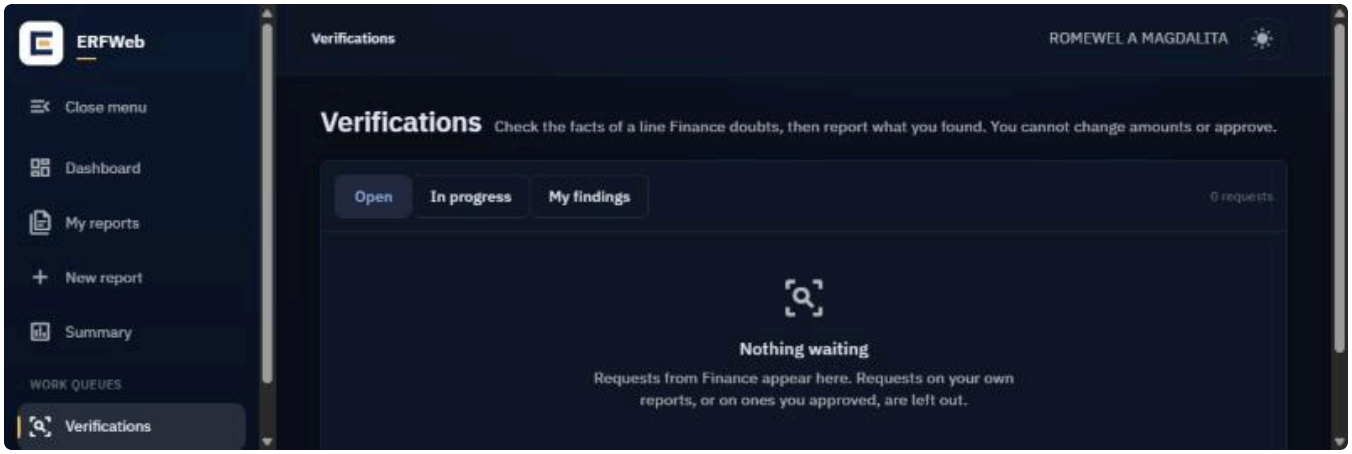

Sign in at the ERFWeb address with your ER System username and password, in Chrome or Edge. The left menu shows **Verifications** under Work queues. You get a text and an email when Finance sends a line you may verify, and again when Level 2 decides on a line you found Not verified. Keep your mobile number and email up to date with the System Administrator.

- You check facts: was the meal, trip or receipt real and right? You never change amounts, approve, return or reject.
- You record **one** finding per request; it cannot be changed afterwards.
- You never verify your own report, a report you approved, or a request you raised. Those are left out of your pool.
- You see a report only while it has a request in the open pool or one you picked up.

Step 1: Pick up a request

The **Verifications** page has three tabs:

Tab	What it lists
Open	Requests from Finance that nobody has picked up yet
In progress	Requests you picked up and have not finished
My findings	Requests you recorded a finding on

1. Click **Verifications** in the left menu.
2. On **Open**, read the request: the report, the expense line, and **Finance:** what Finance doubts.
3. Click the request to open the report, then click **Pick up** on its **Verification** card. The request moves to **In progress** and is yours; other verifiers no longer see it in the pool.

Step 2: Check the line and record your finding

1. Open the report from **In progress** to see the line, its receipt scans and the R47.
2. Check the facts with the people or records involved.
3. On the **Verification** card, click **Record finding**. The **Record your finding** window opens.
4. Pick one:

Finding	When	Note
Verified	The facts check out	Optional
Verified with note	It checks out, with something Finance should know	Required
Not verified	It does not check out; Finance will refer it to Level 2	Required

5. Write **What did you find?** and click **Record finding**.

Your finding is final. Your notes go to Finance and Level 2; the employee sees the finding but not your notes.

After your finding

- **Verified** or **Verified with note**: the request closes. Finance carries on and can clear the report for payment once receipts are in. Finance and the employee are notified.
- **Not verified**: the request goes back to Finance, who queries the Level 2 signatory. Level 2 lets the line through, returns the report to the employee, or rejects it. You are told Level 2's decision.

The request then sits under **My findings**.

Common problems

What you see	What to do
Nothing waiting on Open	No requests right now, or the only ones are on your own reports or reports you approved
A request disappeared from Open	Another verifier picked it up first
Record finding stays off	Verified with note and Not verified need a note under **What did you find?**
A message that the request changed	Someone acted on it at the same time; the page reloads, check it again
You recorded the wrong finding	A finding cannot be changed; tell Finance, who can query Level 2
